

Barnet & Chase Farm Hospitals NHS Trust, Barnet, Paediatrics, temoplateFY, F1, Full Shift, Resident

Calculations based on the template only

Band 1B (Based on template only)

Steps through the banding flowchart:

- New Deal Compliant
- Average work 48 hours a week or less
- Work pattern is a full shift, partial shift or hybrid
- Less than 1/3 of duty hours outside 7am to 7pm Mon-Fri (.026) and less than 1 weekend in 4 (None)

Note: The band of a rota may change if monitored hours of work are different to those suggested by the theoretical work pattern. It is particularly important to remember this if a theoretical work pattern is close to the limits of a particular payband. Differences between calculated prospective cover and actual work done by doctors to cover absent colleagues can also cause a variance between theoretical and monitored bands.

EWTD - docs without adequate long breaks	0		(24+11hrs in 7 days or 48 +11hrs in 14 days)

Calculations combining template and monitoring

This analysis is based on the template, but uses actual average duty period lengths calculated from the diary cards. These are normal working days and duties where a duty code has been entered to link the diary card to the theoretical pattern. There must be at least two

examples of a day type for the average to be used.
