

On-Street PCN code 46

Sign reference: Highway Code, Rule 215. {Laws MT(E&W)R regs 7 & 9, MT(S)R regs 6 & 8, ZPPPCRGD regs 18 & 20, RTRA sects 5 & 8, TSRGD regs 10, 26, 27 & 29(1), RTA 1988 sects 36 & 21(1)}

This contravention deal with vehicles that are stopped where prohibited (on a red route or clearway).

Evidence required for the issue of a PCN

- 1) Evidence must show the vehicle stationary on a red route (single or double red line) or clearway.

Method of Gathering Evidence:

In all cases, whether for signs or markings, it will be a pre-requisite of evidence, that a record has been made that day, or at the time of contravention, that the sign or markings were present, correctly orientated and in good condition.

The EO should capture incidents that clearly show the vehicle stationary in order to demonstrate that the vehicle has stopped. They should do this by capturing a clear context image of the vehicle as soon as is practical, and the second context image demonstrating the vehicle on the red route or clearway.

The time difference between the images should be enough to demonstrate that the vehicle is fixed and immobile. A **continuous** observation period of **30 seconds** should be enforced.

In the close up image, the EO should capture the Vehicle Registration Mark and if possible the Make and Model of the vehicle.

A contemporaneous record of the Camera No, Location, Time, Date, Vehicle Description, Offence code and PEZ id must be kept by the EO and made available on request to authorised personnel.
