**Subject:** SEMMMS Relief Road:Phase 1 EIA  
**Importance:** High

Jamie

Thank you for informing the Ecology Unit about the above scheme SEMMMS Phase 1 (Stockport A6 – Manchester Airport). It is some time since I have had any input into this process. Your letter raises a number of issues as follows.

**Data Search**

GMEU now hosts a Biodiversity Information Officer – Steve Atkins and he will be responsible for providing an update on the biological data. I have discussed this with him and there are a number of points to raise, as follows:-

- The deadline for data retrieval is the 30<sup>th</sup> October. This is totally unreasonable as your letter was only dated the 28<sup>th</sup> October, which actually only gave on working day to process a response. Please could you inform us of a reasonable deadline.
- There is still an administrative charge for the retrieval of this information. We can provide a quote to undertake the work
- The A3 plan you have submitted is not at a sufficient scale to ascertain the route and there is no indication of the buffer within which you would require data from. If it is possible to have a GIS layer of the route it would be very helpful. GEMU work with MapInfo but can import ESRI shape files but not CAD tables.
- Details of local recorders are usually sent with the data search. However you may also wish to discuss this with Steve so that you can approach recorders in tandem with GMEU.
- GMEU undertook several data searches during the last round of SEMMMS discussions and there was an agreement that we could enter the data collected from the SEMMMS surveys onto our database. Please could you indicate what data you will require as part of this search.

Please contact Steve to discuss the details of the data search.

**Ecological Contacts**

I shall be the officer within GMEU who will take the case and we are paid by the Greater Manchester Planning Districts, however there may be internal district staff who should also be involved in any discussions. Since the last round of submissions and discussions about this scheme there has been new staff in several of the districts – I have copied this e-mail to:-

- Emma Wilson – Nature Development Team, Stockport
- James Baggaley – Ecologist, Cheshire East
- Dave Barlow – Biodiversity Engagement Officer, Manchester
- Wilmslow – I am not sure who may be responsible for this part of Cheshire, but it may be James Baggaley.

However, these may not be the most relevant officers and I would suggest that you contact the officers above directly to see who would be dealing with this project.

**EIA Revision**

- When the EIA is submitted it will be very useful to have the original 2001 & 2004 data presented as appendices along with the results of any subsequent surveys and data searches, as many of the authorities will not have kept either paper or electronic copies of the earlier iterations of the EIA and survey results.
- Please could you inform me who will be revising the Ecology Chapter of the EIA. Previously it was Helen Hamilton of Penny Anderson Associates.

24/03/2010

- If you wish to discuss the scope of any update surveys please contact me.

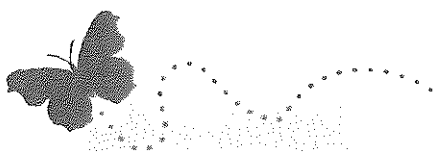

I am sure over the coming months we will have more contact and I look forward to working with your team.

Regards Teresa

Normal 0 DocumentEmail  
Dear Teresa,

Thank you for responding to the consultation letter we sent to you, dated 28th October. I apologise for the deadline provided on the letter, this should have given a deadline of 30th November, rather than October. I hope that this new date provides a reasonable amount of time to consider the proposed scheme design and assessment and to provide a full response.

**Data Search** - We would like to obtain a quote for the data search. Please find attached a GIS shapefile which contains the route alignment (subject to change) and 500m buffer. I would be grateful if you could provide a quote for a data search for both 500m and 1 km buffer zones either side of the alignment. If the data is supplied in MapInfo files we can convert them into the GIS shapefile required for our systems. Please could you provide us with a list of datasets you hold and I will arrange for our ecology team to specify which data sets they require for their assessment.

**Contacts** - We have recently contacted a number of organisations about the SEMMMS Phase 1 scheme, predominantly to re-engage people about the new design proposals. To date, we have received responses and/or information from Tom Hunt at rECOrd (species records), Chris Driver at Cheshire Wildlife Trust (local sites) and Mick Holding at Natural England (designated sites). We have contacted a number of additional bodies, such as the local authorities involved and local interest groups.

**EIA Revision** - Mouchel will be undertaking the ecological assessment for the new Phase 1 proposals. The team leader is our Principal Ecologist, Toby Fisher. At present we are at a very early stage in the assessment and have been undertaking a review of previous assessment reports, data and consultations. We are also currently reviewing the scope of assessment prior to undertaking any survey work.

We will keep you informed of any further developments during the assessment of the proposed scheme.

Kind Regards,
