**Atkins Report A428 Study – Phase 2 Park and Ride Locations**

The Greater Cambridge City Deal Executive Board report dated 13 October 2016 contained a technical note that referred to an Atkins Report A428 Study – Phase 2 Park and Ride Locations 3 June 2016. This is an excerpt from a full report from Atkins.

I therefore request all copies and versions (whether in Word or PDF format including any tracked changes made by officers) of the Atkins report ‘A428 Study Phase 2 Park and Ride Locations’ June 2016.

The Technical Note to which the applicant refers (included in Appendix 1), is not an excerpt from a full report from Atkins.

The statements within the document itself that the note is ‘a summary of the analysis which underpins recommendations on potential Park and Ride locations along the A428, west of Cambridge’ and ‘is part of the wider A428 study’, may have been taken to indicate that there exists a single, discrete report, produced by Atkins (entitled ‘A428 Study Phase 2 Park and Ride Locations’ or similar) which expands upon the Technical Note but this is not the case.

We therefore cannot provide any copies or versions of the report requested as it is not something which exists.

If you are interested in what reports have come out of the wider A428 study, you can find links to them on the [Cambourne to Cambridge- better bus journeys](#) webpage.

I also request all correspondence including emails between Ashley Heller and/or Adrian Shepherd to and from Atkins from March 2016 and 30 June 2016.

Cambridgeshire County Council is at present experiencing technical issues that are preventing staff from accessing their archived emails. It has, therefore, not been possible to collate the requested copies of correspondence.

Once the difficulties around accessing the email archives have been resolved, the response to this request will be updated to include all copies of correspondence which the council would normally be able to provide but which are inaccessible at this point in time.
