

# Site Alarms / Site Muster Points

- Alarm Signals
  - Intermittent every 8 Seconds.
    - Notification of an incident.
  - Continuous Alarm.
    - Full site muster required.

- **If the continuous alarm sounds then you should immediately evacuate site making your way calmly to the Primary Muster point – unless any other instruction is given – i.e. proceed to secondary muster point.**

# Site Alarms / Site Muster Points

- Alarm Signals
    - Intermittent every 8 Seconds.
      - Notification of an incident.
    - Continuous Alarm.
      - Full site muster required.
- 
- If you identify an incident then you should press the Intermittent Alarm button.
  - The Field response team will then assess the situation and either:
    - Evacuate the site – this will be done by pressing the Muster Alarm
    - Stand Down the emergency – this will be communicated by Radio and or Megaphone.
  - If you hear the intermittent alarm then you should make your work area safe, and await further instructions.
