Hi Phil

I have emailed the team that will be gathering the data to make the point that in many ways we must be driven by them as there is no point booking you in and then realising that nobody has returned their questionnaires. At the moment the plan is for us to get the questionnaire, OH notes, possibly GP records and for me to triage it before we book them in with you. So I suspect that June need not be messed with but I have not heard back yet.

I believe that your invoice needs to be addressed to the Police and Crime Commissioner but I will ask Julie to check that for me. I think just your name etc, don't think we need a purchase order yet (but again, we'll check).

[REDACTED]

Best wishes

David

Hi David,

Not quite sure whose move! Looking at the realities of life, I could probably start clearing the odd day during June, it will create some disappointment, but life is full of that.

Do you have any days that are better/worse/no-go and would it be preferable to settle on a standard day, whatever the frequency?

Anything else you need from me, or shall I sit tight? Ok if I send you an invoice for the last case (I am hoping that you will say 'yes', just as a clue!); who do I address it to and are there any identifiers/information that you need on it?

Many thanks, hope that you had a good bank holiday, the realities of consecutive 5-day weeks now return.

Best wishes,
Phil
