This report uses LIVE DATA extracted from MetStats

Date Live data was extracted: 10/02/2012

The data in this report reflects live data which may be subject to small changes over time

Police forces in the United Kingdom are routinely required to provide crime statistics to government bodies and the recording criteria is set nationally. However, the systems used for recording these figures are not generic, nor are the procedures used locally in capturing the crime data. It should be noted that for these reasons this force's response to your questions should not be used for comparison purposes with any other response you may receive.

Notes

1. Trident and Trafalgar shots fired figures will differ from the SCD scorecard figures which are gun crime counts.
2. Serious youth violence can only be produced from FY 08/09.
3. The recording of gun and knife crime are based on the presence of certain recorded feature codes on the crime report, which have changed with the introduction of new definitions or measures over the period requested. It is not possible in most instances to produce data to old definitions after a change.
4. Shots fired flag not introduced until FY 07/08. It was not possible to produce a shots fired count prior to this period.
