

Freedom of Information Act / Environmental Information Regulations Request

Reference: ECC-040311-13

Response: 12 December 2013

Can you please provide the total cost that has been spent on both maintaining and building new flood defences across the county in the last year that data is available?

Essex County Council contributes to three Regional Flood and Coastal Committees funding to support the delivery of flood and coastal erosion risk management activities across the region. These activities include asset replacement, essential maintenance and new projects for communities at risk from all sources of flooding (rainfall, rivers and the sea). With regard to the specific contributions made and whether they went towards maintaining or building new defences in Essex, the Environment Agency (who administers the Regional Flood and Coastal Committee) should be able to provide you with this information.
