Dear [REDACTED]

Rob and I have been busy all day with visitors, but we would hope to get some comments to you tomorrow.

Best wishes

Paul Younger

**Subject:** fracking

Dear Paul,

This Greenpeace blog (<http://www.greenpeace.org.uk/newsdesk/energy/news/factcheck-are-uk-fracking-regulations-earthquakes-ridiculous>) raises a couple of interesting points, and I wondered your response?

- 1) that the magnitude of the tremor matters because of potential to affect well integrity rather than surface effects
- 2) that re-injection processes may take place that cause greater tremors.

Would love to hear your thoughts if you have time

thanks and best wishes
