Sure, no problem.

I was asked by [REDACTED] how the Client is getting on with the actions we took down in the update meeting - have you managed to answer some of the questions so that I can pass that information onto Atkins? Thank you.

Kind regards,

[REDACTED]

Hi [REDACTED],

Please can you request that the team undertaking the Gap Analysis for Ely, includes a drawing to show the location of the existing striking points for each of the crossings and the possible future positions for each?

Many thanks,

[REDACTED]

Hi [REDACTED],

Please can you advise me who is looking after the Level Crossings Analysis work for the Queen Adelaides?

Thanks,

[REDACTED].

**Subject:** Ely North Junction Level Crossing Work Package Supporting Information - Transport Assessment

**Importance:** High

Hi [REDACTED],

I did a bit of a search online and found a transport assessment that should be taken into account (as per the Client Requirements) during the LX Work Package:

[Ely Southern Bypass Transport Assessment](#)

This has future traffic levels that should be modelled in Queen Adelaide – it makes sense to use these for consistency. If it saves money as well, good.

More information linked to this can be found here:

[Ely Southern Bypass Planning Application Documents](#)

Please let me know if you have any concerns. Thank you.

Kind regards,

[REDACTED]
