

FOI1228 – FOI request concerning the secondary processing of uploaded data by the Hampshire Health Record

I can confirm that Southern Health NHS Foundation Trust holds the information you requested:

Could you kindly tell me whether your organisation has opted out of making your uploaded data available for secondary uses such as the analytics database, just like HHNHSFT.

Information provided to HHR Repository from Southern Health NHS Foundation Trust is only for clinical purposes, and remains in the HHR Repository. It does not contribute to the HHRa.

If not, and you do allow the HHR to process information that you have extracted and uploaded for both primary (direct medical care) and secondary purposes, then please could you provide me with the following:

The process by which patients may express to you their wish for information that you hold about them to be uploaded to the HHR for primary purposes *only*, or indeed whether such a wish cannot be respected and it is "all or nothing" with your organisation

The consent is focused on clinical care delivery only. Patients can "opt out" of sharing their information with the HHR Repository – see above.
