Dear Anita Bellows,

Thank you for your Freedom of Information request received on 3 December 2016.

You asked:

“For each month in 2015 and 2016 , please give the number of adverse ESA sanctions decisions broken down by the Summary International Classification of Diseases (i.e. ESA Total; Other; Mental and Behavioural Disorders; Diseases of the Nervous System; Diseases of the Circulatory or Respiratory System; Diseases of the Musculoskeletal system and Connective Tissue; and Injury, Poisoning and certain other consequences of external causes) so that the total in each month matches the adverse decisions figures given in Table 2.1 in the DWP sanctions statistics release of June 2016.

Should any part of this request be undeliverable due to cost or practical considerations, please give top priority to providing the most recent figures and then work backwards month by month as far as possible.”

Please note that the intention of sanctions is to encourage people to engage with the support being offered by Jobcentres by making it clearer to claimants what they are expected to do in return for their benefits. Sanctions are a necessary part of the benefits system. The overwhelming majority of benefit claimants take up the jobs support we offer, with a small minority facing a sanction for not doing so.

In response to your query please find the number of adverse Employment and Support Allowance sanction decisions broken down by the Summary International Classification of Diseases and month the sanction was applied in the table below.

The data provided is for January 2015 to June 2016, the latest data available at the time of request. Please note with respect to the data in more recently published months, care must be taken in using and interpreting this as these are subject to a high degree of revision.

Please ensure you read the notes before using and interpreting this data.

The figures supplied are derived from unpublished information and have not been quality assured to National Statistics or Official Statistics publication standard. They should therefore be treated with caution.

Notes:

1. Cells in this table have had statistical disclosure control applied to avoid the release of confidential data. Therefore totals may not be the sum of the individual cells.
2. Data for the most recent months will be subject to revision as numbers of sanction decisions and decision outcomes can change due to reconsidered decisions and appeals.
3. Data is provided to June 2016 which is the latest available at the time of request
4. **ICD (disease) summary code:** ICD (disease) code Causes of incapacity are based on the International Classification of Diseases, 10th Revision, published by the World Health Organisation. Medical condition is based on evidence provided at the start of the claim and so may not represent a claimant's most recent medical condition.

The "Other" category includes claimants with an unknown medical condition. Please also note that where someone has more than one diagnosis or disabling condition only the predominant one is used.

5. A medical condition does not confer entitlement to Employment Support Allowance and the decision on entitlement is based on the claimant's ability to carry out the range of activities related to physical and mental function, assessed by the Work Capability Assessment
6. **Adverse:** An adverse decision is a decision to apply a sanction i.e. a decision found against the claimant so a sanction is applied or the ESA claim is closed (disallowance).
7. **Please note that the figures supplied are derived from unpublished information and have not been quality assured to National Statistics or Official Statistics publication standard. They should therefore be treated with caution.**
