

Officer site meeting notes for 24 November 2016

Attendees

Jonathan Tidswell (Angus Energy) (JT)
Mark Oldridge (planning agent for Angus Energy)
Samantha Murphy (Surrey County Council)
Alan Stones (Surrey County Council)
Jeffrey Ng (Surrey County Council)

Site meeting held to walk over the current site layout and to view the site.

JT explained that they wished for the workover rig to be placed on Brockham 1 to mirror that borehole to the same depth and log the data. To be on site for 10 days. Cement would be needed down the hole. JT explained he was unsure how many sidetracks were open holes.

JT confirmed that a workover rig would be brought on to Brockham 1. This would involve cementing up holes/ liners/ checking the number of sidetracks from the borehole.

JT confirmed Brockham 2 is a water injector well. May wish for a workover rig to review the borehole.
