Hi [REDACTED]

Hope you're well.

Is it possible to proceed with Option 2, but please allow for some contingency based on additional days for plant, day rate and a rate load for transport and tipping.

If you need any further information then please do not hesitate to contact me.

Kind regards,
[REDACTED]

Hi [REDACTED]

We have two options that I can think of: -

1. Hills can obtain samples and then employ a third party to undertake the testing. Having the material content information would provide some certainty with what we would be dealing with. However, we would need to agree a price and receive an order/instruction from Sandwell for this initial work separate to our providing a quotation for the removal and tipping of deposits/silt.
2. Alternatively, I could provide a quotation to include testing, removal of deposits/silt and make a provisional allowance for transporting to a given maximum distance from site. Testing would need to be done and a tip found prior to any work being undertaken on site, else additional costs would be incurred for temporary storage of the removed material (no one likes unnecessary cost).

Option 1 would give some surety of the haulage and tipping cost but would require up-front expenditure by Sandwell. Option 2 on the other hand would not require up-front expenditure but would not have certainty with the haulage and tipping cost.

Uncertainty remains for both options with the quantity of material to be removed until the work starts. We would provide a quotation with a given number of days for plant on site, then a day rate for any additional days and a rate per load for the transport and tipping.

Kind regards
For and on behalf of
Hills Contractors Limited

Hi [Redacted]

Many thanks for your swift reply.

Is the material content testing something you could undertake?

Thanks,
[Redacted]

Hi [Redacted]

Thank you for considering Hills for your enquiry.

We can take a look to submit a quotation but first need to understand where the sediment can be safely disposed. We need to know the content of the material (WAC & Metals Suite testing as a minimum) to enable us to find a suitable tip to where it can be transported. This would require some upfront expenditure before preparing a quote. Can Sandwell provide this information?

Alternatively, the material can be removed and retained/contained on site at a location instructed by Sandwell.

Hills undertook a project for Sandwell very recently where pool silt was disposed of at a Sandwell depot for further handling. This is another option for its disposal but the content and quantity still remains unknown until testing has been undertaken and the work is carried out.

Please let me know how you would like Hills to proceed.

Kind regards
For and on behalf of
Hills Contractors Limited

Hi [REDACTED]

Hope you're well.

We have a sediment bank on Smethwick Hall Park Pool (Stoney Lane, Smethwick). We would be interested in obtaining a quote from yourselves regarding the removal of this sediment. Is this something you would be interested in undertaking?

Below is map of the pool and the area circled in red refers to the sediment bank.

Hi [REDACTED],

I certainly will thanks. Cheers for the update on the sediment bank, I believe we would have to have a look at the finalised quote before committing to anything..

Kind Regards

Hi [REDACTED]

Thanks for the response. As soon as you have a date for the removal of the fence panels then please let me know.

We are currently arranging a quote for the removal of the sediment bank. Is this something that you would be willing to help finance given the recent issues at site?

Thanks,
[REDACTED]

Hi [REDACTED]

We're awaiting a quote to be approved from our contract Partners to ensure that the fence panels are removed from the pool as safely as possible.

Please could you advise on the attached?

Cheers

Hi [Redacted]

We still have some fencing panels in the Pool at Smethwick Hall. Any idea when these can be removed? The environmental group associated with this area have been chasing this up.

Thanks,
[Redacted]
