Dear [REDACTED]

On behalf of the University of Sussex, I am writing to let you know that the University's full Council met today and agreed almost unanimously to endorse Option 3.

The discussions at Council reflected the view that this endorsement is in the context that both Options 1 and 2 would be extremely challenging, leaving Option 3 as the only acceptable one of the three options presented.

Kind regards

[REDACTED]

Subject: USS consultation

Dear [REDACTED]

I am writing formally to let you know that following a meeting of the Council Chair's Committee the University of Sussex endorses option 3.

We will be holding a full Council teleconference next week and I will write again following that but I do not anticipate that the Council will take a different view to either its principal officers or the University's Executive Team.

The Chair's Committee did express concern that USS have failed to address some of the concerns raised by Aon.

At this stage we do not have other concerns but await, with interest, more details from USS about their thinking around debt monitoring.

With best wishes

[REDACTED]
