Request	<p>I'm requesting to see the mean, maximum, and quintile scores on the R*score scale set for entry into Physics for applicants who were offer holders. (R*score is defined in the admissions report on the department website as, $R^*score = !PAT\ score + 10(cGCSE)$, where cGCSE represents the number of standard deviations away from the "expected number of A*s in GCSE adjusted to context"), including the distribution of PAT scores for offer holders.</p> <p>If a distribution is not possible, the 80th and 90th percentile of those who were short listed and those who were offered will do I also request the expected number of A*s in GCSE for international applicants, along with the standard deviation, for the 2019 cycle.</p>

Dear Rohith S,

I write in reply to your email requesting the above information, which is attached.

Yours sincerely

Information Compliance Team
