Reason for works:	There is level access from a pathway on the north side of the road here but a kerb opposite (see photo below) meaning that wheelchair and pushchair users face a lift up/down to cross this busy road. This will form part of the main route of the new Thetford Sculpture Trail to be created next year.		

Any relevant supporting documents (e.g. supportive correspondence) :	<p>“I wish to register my support of the “Drop kerb Brandon Road” project. Having used this crossing a number of times in the last few months I appreciate that it is important that the infrastructure should make accessing the kerbs as easy and as safe as possible. This is particularly important for those using pushchairs, mobility scooters or pedestrians having any mobility issues. I consider that a dropped kerb at this location would be a valuable safety improvement.” [From an email from a local resident]</p>
