The Hazardous Waste Regulations 2005: Consignment Note

Environment
Agency

CARRIER'S COPY

PART A Notification details

1 Consignment note code: **ARDEMO101330**

2 The waste described below is to be removed from (name, address, postcode, telephone, e-mail, facsimile):

**1 M1 NORFOLK, GABORN AVENUE,
LICHFIELD, WS13 6RL**

3 The waste will be taken to (name, address and postcode):

**LAFARGE LANDFILL, GABORN LANE,
COTESBACH**

4 The waste producer was (if different from 2) (name, address, postcode, telephone, e-mail, facsimile):

ARDEMO 101330

PART B Description of the waste

If continuation sheet used, tick here ☐

1 The process giving rise to the waste(s): **DEMOLITION**

2 SIC (2007) for the process giving rise to the waste: **45.11.1**

3 WASTE DETAILS (where more than one waste type is collected all of the information given below must be completed for each EWC identified)

Description of waste	List of wastes (EWC code)(6 digits)	Quantity (kg)	The chemical/biological components in the waste and their concentrations are:		Physical form (gas, liquid, solid, powder, sludge or mixed)	Hazard code(s)	Container type, number and size
			Component	Concentration (% or mg/kg)			
CEMENT BOND	170605				SOLID	HP3	40L
WASTE							

The information given below is to be completed for each EWC identified

EWC code	UN identification number(s)	Proper shipping name(s)	UN class(es)	Packing group(s)	Special handling requirements
170605	2590	CURIOUS	9	3	As per MSDS

PART C Carrier's certificate

(If more than one carrier is used, please attach schedule for subsequent carriers. If schedule of carriers is attached tick here. ☐)

I certify that I today collected the consignment and that the details in A2, A3 and B3 are correct and I have been advised of any specific handling requirements.

Where this note comprises part of a multiple collection the round number and collection number are

1

1 Carrier name: **AR DEMOLITION LTD**
On behalf of (name, address, postcode, telephone, e-mail, facsimile):

36 MAIN ST, CAPTAIN, NUNKATON, WS13 0RZ

2 Carrier registration no./reason for exemption: **CBDU196681**

3 Vehicle registration no. (or mode of transport, if not road): **XIO ARD**

Signature: **[Signature]**

Date **26/10/2017**

Time

PART D Consignor's certificate

I certify that the information in A, B and C has been completed and is correct, that the carrier is registered or exempt and was advised of the appropriate precautionary measures. All of the waste is packaged and labelled correctly and the carrier has been advised of any special handling requirements.

I confirm that I have fulfilled my duty to apply the waste hierarchy as required by Regulation 12 of the Waste (England and Wales) Regulations 2011.

1 Consignor name: **Steve Soud**

On behalf of (name, address, postcode, telephone, e-mail, facsimile):

Signature: **[Signature]**

Date **26/10/2017**

Sheet of

Tel: 0845 241 6822 Fax: 0845 241 6833 Email: info@pro-clean-indserv.co.uk

PART A Notification details

- 1 Consignment note code: **ARDEMO / P2997**
- 2 The waste described below is to be removed from (name, address, postcode, telephone, e-mail, facsimile):
AR Demolition, Tempest Ford, St John Street, Lichfield WS13 6PB
- 3 Premises code (where applicable): **ARDEMO**

- 4 The waste will be taken to (name, address and postcode):
Robert Hopkins Environmental Bullock Street West Bromwich, B70 7HE
- 5 The waste producer was (if different from 2) (name, address, postcode, telephone, e-mail, facsimile):

PART B Description of the waste

If continuation sheet used, tick here ☐

- 1 The process giving rise to the waste(s) was: **Oil spillage**
- 2 SIC for the process giving rise to the waste: **43.11**
- 3 WASTE DETAILS (where more than one waste type is collected all of the information given below must be completed for each EWC identified)

Description of waste	List of wastes (EWC code)(6 digits)	Quantity (kg)	The chemical/biological components in the waste and their concentrations are:		Physical form (gas, liquid, solid, powder, sludge or mixed)	Hazard code(s)	Container type, number and size
			Component	Concentration (% or mg/kg)			
Oil contamin soil	170503	x3 1BC	Oil	<10%	Liquid	HP	1000L IBC's

The information given below is to be completed for each EWC identified

EWC code	UN identification number(s)	Proper shipping name(s)	UN class(es)	Packing group(s)	Special handling requirements	Tunnel Code
170503	NDC	NDC	NDC	NDC	PPE	

PART C Carrier's certificate

(If more than one carrier is used, please attach schedule for subsequent carriers. If schedule of carriers is attached tick here. ☐)

I certify that I today collected the consignment and that the details in A2, A4 and B3 are correct and I have been advised of any specific handling requirements.

Where this note comprises part of a multiple collection the round number and collection number are:

/

- 1 Carrier name: **CRU**
- On behalf of (name, address, postcode, telephone, e-mail, facsimile):

Pro-Clean Industrial Services Ltd 47 Great Western Street,

- 2 Carrier registration no./reason for exemption:

CBDU93528

- 3 Vehicle registration no. (or mode of transport, if not road): **BX10 AWG**

Signature **C.S.**Date **01/11/2017** Time **10:00**

PART D Consignor's certificate

I certify that the information in A, B and C has been completed and is correct, that the carrier is registered or exempt and was advised of the appropriate precautionary measures. All of the waste is packaged and labelled correctly and the carrier has been advised of any special handling requirements.

I confirm that I have fulfilled my duty to apply the waste hierarchy as required by Regulation 12 of the Waste (England and Wales) Regulations 2011.

- 1 Consignor name: **Robert Hopkins**

On behalf of (name, address, postcode, telephone, e-mail, facsimile):

Signature **Robert Hopkins**Date **01/11/2017** Time **10:00**

PART E Consignee's certificate (where more than one waste type is collected all of the information given below must be completed for each EWC)

Individual EWC code(s) received	Quantity of each EWC code received (kg)	EWC code accepted/rejected	Waste management operation (R or D code)
170503	2800	A	D15

- 1 I received this waste at the address given in A4 on: Date **01/11/2017** Time **12:35**

- 2 Vehicle registration no. (or mode of transport if not road): **BX10 AWG**

Name: **CRU**

On behalf of (name, address, postcode, telephone, e-mail, facsimile):

I certify that waste permit/exempt waste operation number:

2P3537SL

authorises the management of the waste described in B at the address given in A4.

Where the consignment forms part of a multiple collection, as identified in Part C, I certify that the total number of consignments forming the collection are:

Signature **CRU**Date **01/11/2017** Time **12:35**

Re: Enquiry No. 2835525

I refer to our work at Tempest Ford Garage St Johns Street Lichfield WS13 6PB

I confirm that the following actions have been taken in order to minimise the risk of inadvertent contact with live electrical apparatus or cables owned by Western Power Distribution.

1. The service cable was cut and terminated at the point marked 'X'

No work should be undertaken on, or in the vicinity of, any apparatus or cables owned by Western Power Distribution which remain live on the site. **TREAT ALL ELECTRICAL APPARATUS AND CABLES AS LIVE UNLESS PROVED DEAD**

In particular, if you are excavating on site, you must comply with the requirements of Health and Safety Executive guidance laid down in HSG47, Avoiding Danger From Underground Services.

If there are overhead lines crossing the site, you must comply with the requirements of Health and Safety Executive guidance laid down in GS6, Avoidance of Danger from Overhead Electric Lines. **IF IN DOUBT, ASK**

If you have any queries about this letter, please call me on 01782 403698

Yours faithfully,

R Bullen

We've completed your pipe work

We've completed the pipe work at your property. If we haven't already, we'll come back within 5 working days to make good any excavations outside of your property boundary and within your property boundary where this was requested as part of your quotation. We'll also make sure the site has been cleared of our boards, barriers and equipment.

If you have any heavy plant / equipment on site, for your safety and to avoid charges for damaging the pipe, please contact us as soon as convenient on our Plant Protection hotline 0800 688 588 so we can talk to you about this.

It will be a big help to us if you let us know our Quotation Reference number when you call or write to us (it's at the top of this letter).

A Customer Information Sheet is attached to all letters to help you track the progress of your request and provide you with related information.

If we haven't already, we'll come back within 5 working days to make good any excavations outside of your property boundary and within your property boundary where this was requested as part of your quotation. We'll also make sure the site has been cleared of our boards, barriers and equipment.

If you have any heavy plant / equipment on site, for your safety and to avoid charges for damaging the pipe, please contact us as soon as convenient on our Plant Protection hotline 0800 688 588 so we can talk to you about this.

It will be a big help to us if you let us know our Quotation Reference number when you call or write to us (it's at the top of this letter).

A Customer Information Sheet is attached to all letters to help you track the progress of your request and provide you with related information.

Dear Sir,

NOTICE UNDER SECTION 81 OF THE BUILDING ACT 1984
DEMOLITION – Tempest Ford, St John Street, Lichfield, Staffordshire,
CASE No. 17/00053/DEM

With reference to your notice of intention to demolish the above building under section 80 of the Building Act 1984 you are required to take the actions listed on the attached sheet within 6 weeks of demolition commencing.

You are reminded that it is also a requirement of Section 80 to provide a minimum of six weeks notice to, wherever relevant, the appropriate undertaker for gas and electricity. When doing so it will be necessary to quote the customer reference number, name of supply company, and a contact telephone number of the owner of the building. Where the building in question is attached to an adjacent building then the occupier of that building should be similarly notified. It is also recommended that the water supply company also be notified at this time.

Before undertaking the work relating to the sealing and removal of any drainage you are required to give at least 48 hours notice to the local authority. Similarly, 24 hours notice is required before the surface of the site is reinstated after the excavation works associated with such work.

Your attention is drawn to sections 83 and 102 of the act, which give detail of your rights of appeal against this notice.

Yours faithfully

Ged Cooper
 Building Control Manager

CONDITIONS OF DEMOLITION

CASE No 17/00053/DEM

1. Remove material or rubbish resulting from demolition and clearance of the site.
2. Disconnect and seal any sewer or drain in or under the building at a point agreed with the Building Control Officer.
3. Remove any such sewer or drain from the point of sealing.
4. Make good the ground disturbed by work connected with the sealing and removal of drainage.
5. Make arrangements for the burning of any materials on site with the Health and Safety Executive (building(s) forming part of special premises) and /or the fire authority.
6. Take steps for the protection of the public and preserve public amenity, both during demolition and upon completion of the work.

HINCKLEY AND BOSWORTH BOROUGH COUNCIL

ENVIRONMENTAL PERMITTING REGULATIONS 2010

PERMIT TO OPERATE

Reference Number: **EPR-7a**

The Hinckley & Bosworth Borough Council hereby permits:

A.R. Plant Ltd, 36 Main Street, Carlton, Nuneaton, Warwickshire, CV13 0EZ

in accordance with Regulation 13 of the Environmental Permitting (England and Wales) Regulations 2010, to carry on the operation of a mobile plant for the crushing and screening of minerals as specified in the application, as duly made to the Hinckley and Bosworth Borough Council.

A.R. Plant Ltd, 36 Main Street, Carlton, Nuneaton, Warwickshire, CV13 0EZ

shall carry out the permitted process in accordance with the following 19 Conditions attached to this Permit. This Permit shall be subject to replacement, variation, or amendment, as may be considered appropriate by the Hinckley & Bosworth Borough Council under the relevant provisions of the Environmental Permitting (England and Wales) Regulations 2010.

Dated 30 March 2016

R. Parkinson
Chief Officer (Environmental Health)

Hinckley & Bosworth Borough Council
Environmental Health
Hinckley Hub
Rugby Road
Hinckley
Leics LE10 0FR

Activity description

The activity that is the subject of this permit is the crushing, grinding and grading of construction materials to obtain aggregates by the use of a mobile plant called Kleeman Impactor MR110Z EVO 2, serial number K018-0089.

Material is delivered by a belt feeder to a moving jaw that crushes and pulverises materials to make an aggregate that after grading by a vibrating screen is delivered by conveyor to a working stockpile.

An integral diesel electric generator powers the Kleeman Impactor MR110Z EVO 2.

Dust control is achieved by enclosure of the crusher and grader within the walls of the unit and by the application of a fogging water spray to the belt feed and product conveyor.

The Kleeman Impactor MR110Z EVO 2, will normally be operated by a trained operative employed by AR Plant Ltd. The operator needs to be aware that when an employee of the permit holder retains full responsibility for operating the Kleeman Impactor MR110Z EVO 2, this permit is sufficient. If at any time the hirer of the machine takes over operation of the machine the hirer will require a separate permit.

Serial numbers	Plant type
K018-0089	Kleeman Impactor MR110Z EVO 2

Conditions

Asbestos

1. Asbestos shall not be crushed or screened.

Notifications

2. The operator shall, before the mobile plant is operated, notify the regulator of the site where the mobile plant is to be operated, and the regulator who issued the permit:

- a. where and when the mobile plant is expected to start operating, and
- b. the serial numbers of the mobile plant involved.

3. The operator shall submit to the regulator who issued the permit any changes to the list of permitted plant. The plant new to the list shall not be used until the regulator has approved the alteration to the list of permitted plant.

Emissions and monitoring

4. No visible particulate matter shall be emitted beyond the installation boundary.

5. The emission requirements and methods and frequency of monitoring set out in Table 1 shall be complied with.

6. All plant and equipment capable of causing, or preventing, emissions shall be maintained in accordance with the manufacturer's instructions. Records shall be kept of such maintenance.

Aggregates delivery and storage

7. Dusty materials (including dusty wastes) shall only be stored in a suitable and secure location taking into account prevailing winds, proximity of neighbours, the site boundary and site operations and shall be subject to suppression and management techniques to minimise dust emissions.

Crushers and screening units

8. Crushers shall be totally contained or fitted with a water suppression system over the crusher aperture

9. Where the use of water as a method of dust suppression is necessary in order to meet the emission limits, it shall be used. In such circumstances, if water of the required pressure is not available for use on the suppression system, then the process shall not operate.

10. Deposits of dust on external parts of the plant shall be cleaned off at the end of each working day in order to minimise the potential for wind entrainment.

11. Processed materials likely to generate dust shall be conditioned with water prior to internal transfer.

Belt conveying

12. All dusty materials, including wastes, shall be conveyed using a conveyor of sufficient capacity to handle maximum loads without spillage, conveyor belts should not be overloaded. All transfer points shall be fitted with adequate protection against wind whipping.

Loading, unloading and transport

13. No potentially dusty materials (including wastes) or finished products shall arrive on or leave the site other than by use of vehicles which are sheeted or otherwise totally enclosed as soon as possible after loading and before leaving the site. This need not be applied to the loading of crushed material greater than 75 mm.

Roadways and transportation

14. All areas where there is regular movement of vehicles shall have a consolidated surface capable of being cleaned, and these surfaces shall be kept clean and in good repair, or shall be kept wet. Quarry haul roads are excluded from this provision.

15. Vehicles shall not track material from the site onto the highway.

Records and training

16. Written or computer records of all tests and monitoring shall be kept by the operator for at least 24 months. They and a copy of all manufacturer's instructions referred to in this permit shall be made available for examination by the Council. Records shall be kept of operator inspections, including those for visible emissions.

17. Staff at all levels shall receive the necessary training and instruction to enable them to comply with the conditions of this permit. Records shall be kept of relevant training undertaken.

Best available techniques

18. The best available techniques shall be used to prevent or, where that is not practicable, reduce emissions from the installation in relation to any aspect of the operation of the installation which is not regulated by any other condition of this permit.

19. If the operator proposes to make a change in operation of the installation, he must, at least 14 days before making the change, notify the regulator in writing. The notification must contain a description of the proposed change in operation. It is not necessary to make such a notification if an application to vary this permit has been made and the application contains a description of the proposed change. In this condition „change in operation“ means a change in the nature or functioning, or an extension, of the installation, which may have consequences for the environment.

Table 1 Emission Limits Monitoring and other requirements				
Substance				
Particulate Matter	Whole process	Avoidance of visible emissions crossing the (construction) site boundary	Recorded operator observations	On start up and on at least two more occasions each day
Smoke	engines	No visible smoke during normal operation	*Recorded operator observations	*On start up and on at least two more occasions each day

Right to Appeal

You have the right of appeal against this permit within 6 months of the date of the decision. The Council can tell you how to appeal.

You will normally be expected to pay your own expenses during an appeal.

You will be liable for prosecution if you fail to comply with the conditions of this permit. If found guilty, the maximum penalty for each offence if prosecuted in a Magistrates Court is £50,000 and/or 6 months imprisonment. In a Crown Court it is an unlimited fine and/or 5 years imprisonment.

Our enforcement of your permit will be in accordance with the Regulators" Compliance Code.

HINCKLEY AND BOSWORTH BOROUGH COUNCIL

HINCKLEY AND BOSWORTH BOROUGH COUNCIL

ENVIRONMENTAL PERMITTING REGULATIONS 2010

PERMIT TO OPERATE

Reference Number: **EPR-22**

The Hinckley & Bosworth Borough Council hereby permits:

**A R Aggregates Ltd, 36 Main Street, Carlton, Nuneaton, Warwickshire,
CV13 0EZ**

in accordance with Regulation 13 of the Environmental Permitting (England and Wales) Regulations 2010, to carry on the operation of a mobile plant for the crushing and screening of minerals as specified in the application, as duly made to the Hinckley and Bosworth Borough Council.

**A R Aggregates Ltd, 36 Main Street, Carlton, Nuneaton, Warwickshire,
CV13 0EZ**

shall carry out the permitted process in accordance with the following 19 Conditions attached to this Permit. This Permit shall be subject to replacement, variation, or amendment, as may be considered appropriate by the Hinckley & Bosworth Borough Council under the relevant provisions of the Environmental Permitting (England and Wales) Regulations 2010.

Dated 19 May 2014

R. Parkinson
Chief Officer Environmental Health

Hinckley & Bosworth Borough Council,
Council Offices,
Argents Mead,
Hinckley,
Leicester,
LE10 1BZ

Conditions

Asbestos

1. Asbestos shall not be crushed or screened.

Notifications

2. The operator shall, before the mobile plant is operated, notify the regulator of the site where the mobile plant is to be operated, and the regulator who issued the permit:
 - a. where and when the mobile plant is expected to start operating, and
 - b. the serial numbers of the mobile plant involved.
3. The operator shall submit to the regulator who issued the permit any changes to the list of permitted plant. The plant new to the list shall not be used until the regulator has approved the alteration to the list of permitted plant.

Emissions and monitoring

4. No visible particulate matter shall be emitted beyond the installation boundary.
5. The emission requirements and methods and frequency of monitoring set out in Table 1 shall be complied with.
6. All plant and equipment capable of causing, or preventing, emissions shall be maintained in accordance with the manufacturer's instructions. Records shall be kept of such maintenance.

Aggregates delivery and storage

7. Dusty materials (including dusty wastes) shall only be stored in a suitable location taking into account prevailing winds, proximity of neighbours to the site boundary and site operations and shall be subject to suppression and management techniques to minimise dust emissions.

Crushers and screening units

8. Crushers shall be totally contained or fitted with a water suppression system over the crusher aperture
9. Where the use of water as a method of dust suppression is necessary in order to meet the emission limits, it shall be used. In such circumstances, if water of the required pressure is not available for use on the suppression system, then the process shall not operate.

19. If the operator proposes to make a change in operation of the installation, he must, at least 14 days before making the change, notify the regulator in writing. The notification must contain a description of the proposed change in operation. It is not necessary to make such a notification if an application to vary this permit has been made and the application contains a description of the proposed change. In this condition „change in operation“ means a change in the nature or functioning, or an extension, of the installation, which may have consequences for the environment.

Table 1 Emission Limits Monitoring and other requirements				
Substance				
Particulate Matter	Whole process	Avoidance of visible emissions crossing the (construction) site boundary	Recorded operator observations	On start up and on at least two more occasions each day
Smoke	engines	No visible smoke during normal operation	*Recorded operator observations	*On start up and on at least two more occasions each day

Right to Appeal

You have the right of appeal against this permit within 6 months of the date of the decision. The Council can tell you how to appeal.

You will normally be expected to pay your own expenses during an appeal.

You will be liable for prosecution if you fail to comply with the conditions of this permit. If found guilty, the maximum penalty for each offence if prosecuted in a Magistrates Court is £50,000 and/or 6 months imprisonment. In a Crown Court it is an unlimited fine and/or 5 years imprisonment.

Our enforcement of your permit will be in accordance with the Regulators" Compliance Code.

Nuneaton
Warwickshire
CV13 0EZ

Dear Mr Dolman

Pollution Prevention and Control Act 1999
The Environmental Permitting (England and Wales) Regulations 2010,
Regulation 20, permit variation– A.R. Plant Ltd

Following recent amendments to the process guidance notes for mobile crushing plant I have reviewed the above permit. The new permits are enclosed and are now "simplified" permits. You will note that there are fewer conditions on the permit however there are very few changes to what was previously required.

Please find enclosed the varied permit EPR-7a.

The updated process guidance notes are available at:
<http://www.defra.gov.uk/industrial-emissions/files/06092012-pgn-316.pdf>

Should you wish to discuss any matters relating to your Permit please contact me on the above telephone number.

Yours sincerely

Giles Rawdon
Environmental Health Officer (Pollution)

Hinckley and Bosworth Borough Council ("the Council"), in the exercise of the powers conferred upon it by regulation 20 of the Environmental Permitting (England and Wales) Regulations 2010¹ ("the 2010 Regulations") hereby gives you notice as follows-

The Council has decided to vary the conditions of permit reference EPR-7 granted under regulation 12 of the Environmental Permitting (England and Wales) Regulations 2010 in respect of the operation of a mobile plant for the crushing and screening of minerals.

The variation of the conditions of the permit and the date on which they are to take effect are specified in Schedule 1 to this notice.

Signed on behalf of Hinckley and Bosworth Borough Council

PERMIT TO OPERATE

Reference Number: **EPR-7a**

The Hinckley & Bosworth Borough Council hereby permits:

A.R. Plant Ltd, 36 Main Street, Carlton, Nuneaton, Warwickshire, CV13 0EZ

in accordance with Regulation 13 of the Environmental Permitting (England and Wales) Regulations 2010, to carry on the operation of a mobile plant for the crushing and screening of minerals as specified in the application, as duly made to the Hinckley and Bosworth Borough Council.

A.R. Plant Ltd, 36 Main Street, Carlton, Nuneaton, Warwickshire, CV13 0EZ

shall carry out the permitted process in accordance with the following 19 Conditions attached to this Permit. This Permit shall be subject to replacement, variation, or amendment, as may be considered appropriate by the Hinckley & Bosworth Borough Council under the relevant provisions of the Environmental Permitting (England and Wales) Regulations 2010.

Activity description

The activity that is the subject of this permit is the crushing, grinding and grading of construction materials to obtain aggregates by the use of a mobile plant called a Sandvik QJ340 Mobile Crusher, serial number 1886SW10251.

Material is delivered by a belt feeder to a moving jaw that crushes and pulverises materials to make an aggregate that after grading by a vibrating screen is delivered by conveyor to a working stockpile.

An integral diesel electric generator powers the Sandvik QJ340 Mobile Crusher.

Dust control is achieved by enclosure of the crusher and grader within the walls of the unit and by the application of a fogging water spray to the belt feed and product conveyor.

The Sandvik QJ340 Mobile Crusher, will normally be operated by a trained operative employed by AR Plant Ltd. The operator needs to be aware that when an employee of the permit holder retains full responsibility for operating the Sandvik QJ340 Mobile Crusher, this permit is sufficient. If at any time the hirer of the machine takes over operation of the machine the hirer will require a separate permit.

Serial numbers	Plant type
1886SW10251	Tracked Sandvik Crusher QJ 340
1886SW10256	Sandvik Screener QA 450
1886SW10249	Sandvik Screener QE 340

Conditions

Asbestos

1. Asbestos shall not be crushed or screened.

Notifications

2. The operator shall, before the mobile plant is operated, notify the regulator of the site where the mobile plant is to be operated, and the regulator who issued the permit:
 - a. where and when the mobile plant is expected to start operating, and
 - b. the serial numbers of the mobile plant involved.
3. The operator shall submit to the regulator who issued the permit any changes to the list of permitted plant. The plant new to the list shall not be used until the regulator has approved the alteration to the list of permitted plant.

Emissions and monitoring

4. No visible particulate matter shall be emitted beyond the installation boundary.
5. The emission requirements and methods and frequency of monitoring set out in Table 1 shall be complied with.
6. All plant and equipment capable of causing, or preventing, emissions shall be maintained in accordance with the manufacturer's instructions. Records shall be kept of such maintenance.

Aggregates delivery and storage

7. Dusty materials (including dusty wastes) shall only be stored in [specify storage location] as detailed on the plan attached to this permit and shall be subject to suppression and management techniques to minimise dust emissions.

Crushers and screening units

8. Crushers shall be totally contained or fitted with a water suppression system over the crusher aperture
9. Where the use of water as a method of dust suppression is necessary in order to meet the emission limits, it shall be used. In such circumstances, if water of the required pressure is not available for use on the suppression system, then the process shall not operate.

10. Deposits of dust on external parts of the plant shall be cleaned off at the end of each working day in order to minimise the potential for wind entrainment.

11. Processed materials likely to generate dust shall be conditioned with water prior to internal transfer.

Belt conveying

12. All dusty materials, including wastes, shall be conveyed using a conveyor of sufficient capacity to handle maximum loads without spillage, conveyor belts should not be overloaded. All transfer points shall be fitted with adequate protection against wind whipping.

Loading, unloading and transport

13. No potentially dusty materials (including wastes) or finished products shall arrive on or leave the site other than by use of vehicles which are sheeted or otherwise totally enclosed as soon as possible after loading and before leaving the site. This need not be applied to the loading of crushed material greater than 75 mm.

Roadways and transportation

14. All areas where there is regular movement of vehicles shall have a consolidated surface capable of being cleaned, and these surfaces shall be kept clean and in good repair, or shall be kept wet. Quarry haul roads are excluded from this provision.

15. Vehicles shall not track material from the site onto the highway.

Records and training

16. Written or computer records of all tests and monitoring shall be kept by the operator for at least 24 months. They and a copy of all manufacturer's instructions referred to in this permit shall be made available for examination by the Council. Records shall be kept of operator inspections, including those for visible emissions.

17. Staff at all levels shall receive the necessary training and instruction to enable them to comply with the conditions of this permit. Records shall be kept of relevant training undertaken.

Best available techniques

18. The best available techniques shall be used to prevent or, where that is not practicable, reduce emissions from the installation in relation to any aspect of the operation of the installation which is not regulated by any other condition of this permit.

19. If the operator proposes to make a change in operation of the installation, he must, at least 14 days before making the change, notify the regulator in writing. The notification must contain a description of the proposed change in operation. It is not necessary to make such a notification if an application to vary this permit has been made and the application contains a description of the proposed change. In this condition „change in operation“ means a change in the nature or functioning, or an extension, of the installation, which may have consequences for the environment.

Registration complete

This confirmation email has been sent to all contacts responsible for this waste operation.

This is not a permit

Your responsibilities

The business or organisation responsible for carrying out the exempt waste operations agrees to:

- comply with all limits on waste types and quantities
- comply with all conditions governing how waste must be stored, handled and treated
- carry out the operations without endangering human health or harming the environment

For the operations to remain exempt they must be carried out without:

- causing risk to water, air, soil, plants or animals

- causing a nuisance through noise and odours
- negatively affecting the countryside or places of special interest

In sensitive locations extra controls may be needed over and above those set out in the exemptions to make sure this happens.
