### Notes:

- 1 The schools and academies that are listed are either constructed or part constructed Pre-2000.
- 2 The individual schools and academies have the duty to manage asbestos, there fore not all information is available to the authority.
- 3 The City Councils' Premises and Client Team offers a Service Level Agreement (SLA) which can be purchased by each school and academy which includes asbestos monitoring.
- 4 The asbestos monitoring dates for the schools and academies within the SLA are included only as we are not privy to the details for schools and academies outside the SLA.
- 5 There is a three year programme to complete a new asbestos management survey and management plan at all of the pre2000 schools and academies which commenced in August 2016, to ensure full compliance with the latest guidance.
