

**FOI: 23960043 Barnet Grove Liveable Streets Consultation**

I recently wrote an email to Chris Harrison, Cllr John Pierce & Mayor John Biggs and as yet have not received a response.

The email was with regards the recent Barnet Grove E2/Liveable Streets Consultation regarding road closure options that was online and in paper form. I would like to know the answers to the following questions:

How many changes/updates were made to the survey/consultation site for Barnet Grove after it went live?

The web pages were updated with maps to enable residents to see the overall area in context to the Liveable Streets proposals. The consultation and consultation questions were in regards to the location of closure points on Barnet Grove, Wellington Row, Quilter Street and Durant Street which were not updated or changed.

What approval process do you have in place when you need to make changes?

This depends on the changes being made but for updates to the website this approval is via the Programme Director for Liveable Streets and the Communications Team.

Who is making the changes?

The Liveable Streets Team make changes

Do you have a change management contract with Tower Hamlets? If so, can we see it?

The Liveable Street team run the programme and it is hosted on the Tower Hamlets website.

Are you aware any changes make the survey/consultation invalid?

I would suggest that would depend on the changes and what is changing. I do not believe any of the changes we have made through the consultation process have invalidated the consultation.

Could you please supply answers to the above questions.
