

One City Plan – International Goals

The purpose of this session is to review the One City Goals related to International engagement and agree on the priority Goals for the International Strategy Board to focus on as a collective in the short term (in 2019/2020) and in the longer term.

We have pulled out the goals below from the One City Plan which have an international relations element to them, although they may not all require oversight from the International Strategy Board. The One City Plan and its full list of goals can be found [here](#).

The ask of board members is to come to the 25 June International Strategy Board meeting with 2 or 3 goals that should be a priority for the International Strategy Board to work together to deliver, including what support is needed from the Board in terms of international trips, funding, profile raising, events etc. Your priority goals may or may not be the responsibility of your organisation to deliver but those that you consider important for the Board to have oversight of as a collective.

The next amendment of the One City Plan will take place after the summer and so this session will support us feeding in to this. Note that there is no guarantee that our feedback can be accommodated as there will be other submissions and consultations with the community.
