[section 40(2) – FOIA],

We hold no information in Asset Management Team on the building. Property Services may have information and you should contact [section 40(2) – FOIA] to point you in the right direction.

Looking at the OS/GIS and aerial photograph, there are two buildings side by side. The building which runs alongside the car park also has an outbuilding to the rear.

Prior to demolition, a Type 3 Asbestos Survey will need to be undertaken. This is an intrusive survey which should be undertaken immediately the building has been vacated but not before (without careful consideration). If the building is still in use and an asbestos survey is required urgently, a Type 2 survey (non-intrusive) will need to be undertaken. This can be followed at a later date by the Type 3 survey if necessary.

Good Morning [section 40(2) – FOIA],

I was wondering if you could help me find asbestos information for another LBB asset or redirect me to someone else in your team as appropriate; I'm afraid you are the only one I know!

There is a building located at the front of Brunswick Park; it is currently leased to a church and is referred to as a 'Community Hut' although I think it has had a couple of different names depending on its use – Veterans Hall, Monkfrith Boys Club – are two other names I have come across. I looked in the Asset Data folder and didn't see a folder with any of these names. The building is due to be demolished in the next year or so and I am trying to find out if we hold any Asbestos information.

Can you help?

Thanks,

[section 40(2) – FOIA]

[section 40(2) – FOIA],

I have heard back from Adams Environmental concerning the asbestos report. They confirm that the report is not assignable to a third party. They refer to a clause in the report (1.1) "Adams Environmental Ltd cannot accept responsibility to any third parties to whom this report may be circulated, in full or part, and any such parties shall rely on the findings of the report at their own risk."
