Server room/Switch Room

'buildings' approach to the ICT provision or if each service is providing their own.

Is one service leading on the ICT provision?

Currently schools IT is not supported by corporate IS. Also, what will the situation be with telephone provision? We would want 100mg line to the building.

One problem that could arise is where the comms lines come into the building? If each partner is organising their own comms, then there could be unnecessary entry points to the building. Also, are there going to be multiple comms rooms? These will need air conditioning and fire suppression.

We would also want to use schools access to London grid for learning.

It's likely that we would need to have the WiFi for both public and staff but would we be organising that for the whole building?

Brief/Plan that defines our requirement and who will be responsible for what by 1.4.10??

[section 40(2) – FOIA] availability next week

Server room - increase

LGFL into the building

Do we put in a separate corporate line

Public/private wifi - [section 40(2) – FOIA]/ [section 40(2) – FOIA] speak to LGFL about how they link up and can they support public wifi.

Private piece if more difficult because it is usually a corporate line. SAP, private wifi and links to corporate network.

Libraries staff need to be able to access network but could they use citrix or vpn

Shared drive, corporate email, SAP if they are line managers and self service.

Corporate telephony can be delivered through lgfl

Library - min 100mg line

Can library just be a school site, lgfl site - will corporate be happy for us to link in via citrix or vpn??

Ensure the private network has different key so they don't get kicked off.

Library server - hosted at Hendon. Hendon has an lgfl line but issue is corporate IS are unhappy with the access .. Tension between public/private. How is that being accessed?

[section 40(2) – FOIA] speak to [section 40(2) – FOIA]/ [section 40(2) – FOIA] about this.

Funding - Children's Service 18K a year - pay difference of 13K

100K - 10K initial set up (paid by project), Children's Centre pay 4 may be able to squeeze something out of Acorn.

Support model - Libraries, IS will likely continue. CC? Will corporate support

them?

Wifi - same across building but how it is divided up and managed is another discussion. If only LGFL then we would have two Wifi networks which everyone would use. But someone would have to be responsible for managing the wifi. Who supports both parts. Makes sense to look at economies of scale and join things up if they can.

Question 1 - [section 40(2) – FOIA]/Mgmt System

Question 2 - Agreement by Corporate IS

Question 3 - Approval by services

Brief to include - telephony, switches, phone system, etc.
