Subject: Brunswick Park Centre

Hi [section40(2) – FOIA]

We're designing a scheme in Barnet which is located along Brunswick Park. The scheme include a Health centre (about 320 m2) a Nursery/children centre/Acorn assessment centre/hydrotherapy pool (about 800 m2) and a library (about 280 m2). We'd like to quantify the amount of bins require for this type of project and make sure the refuse store is big enough. You've send us few month ago a very helpful list of requirement for Colindale primary school project and it would be very much appreciated if you could do the same for this project ?

Just to let you know, there is a small kitchen (15 m2) on the North side of the project to prepare sandwiches/basics food for 40 kids. The composting process (vegetables waste) will be done on site in an appropriate bin on the children play area.

I've attached in this email :

- The ground floor plan showing the refuse store and the access to it.
- The first floor
- The landscape plan showing the access for the refuse truck and the turning cycle at the end of the road. We assumed that the refuse truck will collect the bins of the school (early in the morning apparently) and will drive down to the new Brunswick park centre to collect our bins. This plan also show the location of the service bay.
- A 3D view for a better understanding of the context.

If you need any help please do not hesitate to contact me.

Thank you

Regards
