Subject: FoI Request - F0014465

Categories: Egress Switch: Unencrypted

Hi Jo,

The Department has received a further Freedom of Information request that relates to your organisation. The request asks for copies of any correspondence that has taken place between the Department (in particular on BSOG) and FACT, HACT and ESACT about investigations that have taken place over the BSOG funding since March 2016. It also requests any further correspondence that has taken place since the last FoI request in December. I believe that Chris Brown was in contact with you about this request.

As per the previous request, there is some information that would have been supplied by you. I have found the following that I plan to disclose as part the request:

- Details about the a FoI request make in September 2016, which I corresponded with you about the information I was going to release and you said this was ok to release;
- A letter from me asking for information from FACT, HACT and ESACT to show that all 3 charities were still eligible for BSOG and your response to that. Plus my response to the information provided by you.
- This e-mail and the response provided by you will also need to be included.

I have also had a further update from Chris relating to the request he received in December and contacted you about on 9 January. Part of this information will include the reports that were sent to Chris and I would prefer to send a link out for the reports rather than having to attach them to the response, however, I have tried to look to see if your annual reports are on line, and I am unable to find them, so grateful if you could let me know if they are available on line.

Thank you for your help
Rachael
