Subject: Further Objections to Cable Car

Hi Justin

TfL has reviewed the additional representations made by [REDACTED] FoE, AEF and [REDACTED] and has nothing further to add.

In TfL's view the representations are not materially different from those previously submitted to the London Borough of Newham and they raise nothing new. The matters referred to in these representations have been fully considered and addressed, including at the Borough's two separate planning committees at which, in both cases, the Committee resolved to grant approval.

In TfL's opinion, the Mayor has all material necessary for his consideration of the application including, without limitation, the advice from NATS and the representations made by DfT, the CAA and London City Airport.

Hope this is helpful

Neil
