

FOI/000181 Camera car, warning notice and PCN

Responses shown in bold

1) What is a "warning notice"? There is no similar concept for other parking offences, so why in this situation?

A warning Penalty Charge Notice is issued to alert the motorist to the parking contravention committed where new restrictions/Traffic Regulation Orders are introduced.

2) How many such notices have been issued since 28/08/18 (please state to what date). This will include any currently awaiting DVLA information)

22 up to 12th October 2018

3) Between these same dates, for how many days was the vehicle deployed?

30

4) Between the same dates how many PCNs have been issued? How many times has an infringement been recorded by an identifiable vehicle and a PCN NOT been issued? If this has happened, what are the reasons?

None.

5) Speed camera deployment schedules are published in advance on your website. Why then are the camera car schedules not published too? Is this determined by legislation or choice?

Patrols undertaken in respect of parking enforcement are not published in advance. This is the choice of Leicestershire County Council.

6) Are there published guidelines for the operation of camera cars?

Any authority deciding to undertake camera enforcement must comply with legislation in accordance with the Traffic Management Act 2004.
