Design an Oyster Card Wallet Competition

We need your help to tackle the issue of anti-social behaviour and to improve passenger experience for everyone. Your design must include a slogan or message based on the assembly. Keep the most important details of your design inside and away from the thickest black line. So we can print your drawing right to the edges you must continue your background over this line and up to the outside dotted line. Please note: faint colours and light shading **DO NOT** print well - choose bold colours and shade strongly.
