Margaret re the residents report of sighting electrical flashes in the trench work last Wednesday evening 18/5/16, 11pm in Forest Road, this is very possible, during excavation of the trench for the gas pipe an electrical cable was damaged due to the cover not meeting the required depth (see picture attached and NJUG document) this was reported immediately and the incumbent DNO carried out the necessary repair. We are not aware of when this was carried out and may have been late at night.

Apologies for not reporting this and making you aware, the trench work is all now reinstated and the council are very happy with it (see photo attached).

If you require any further information please do not hesitate to contact me.

Regards *John*

John

We have received an email report of a H&S concern regarding the trench works in Forest Road. This is an extract from a resident and we need to respond tomorrow to any concerns.

"There are works in progress at the moment on the site affected (trenches have been dug for gas and electrics), is this part of the proposal? I would like to add that we have reported safety concerns regarding these works (on Wednesday evening, 11:00pm, I saw two large electric flashes coming from the trenches)."

I would say I am concerned I am not being kept up to date with progress of the trench works in Forest Road and any issues experienced or raised.

Can you please provide advice urgently? The College is answerable as we have prompted and paid for the works etc. even if it is on the Highway.

Thank you

Margaret
