OFFICIAL

Central Park info, it's on the website with a map its rally clear

This is not a development this is about improving the parks drainage and making it more accessible and creating a series of small ponds to stop flooding and improve the area, some trees will come down 11 and replaced by 50

Hope this helps , give me call if you want

Sue

Dear all

As per the conversation we had last week, please see attached the draft FAQs for the Central Park ponds. We will be creating a dedicated page for the ponds project on the PCC website which will include these FAQs as a drop down. This should go live tomorrow.

Please let us know if you have any comments.

Regards
