Recurrence: (none)

Meeting Status: Not yet responded

Organizer: Sydenham, Zoe
Required Attendees: Goslin, Jeremy; Allen, Sarah; Carson, Tony; Corvid, Margaret; Singh, Chaz; Davey, Sam; Laing, Jemima; Neil, Kevin; Sue Dann [REDACTED] Deeney, Kathryn; Sarah Foque [REDACTED] Cottam, Andy; Andrew Clanfield [REDACTED]

Dear all

As Councillors of the Wards adjacent to Central Park, I would like to invite you to a presentation on the proposed drainage improvements to Central Park which have been submitted for planning permission.

The current phase of work concerns Coronation Avenue down to Barn Park and will provide amenity improvements to areas previously subject to flooding, resolving land drainage and enabling visitors to access the park year round by providing:

- Amenity improvements to areas that have previously been subject to flooding, resolving land drainage and enabling visitors to access the park year round
- An increase in wildlife & nature, safeguarding significant trees and delivering net gain in biodiversity and tree cover through permanent ponds and new planting
- A new destination area at Barn Park entrance with seating, interpretation and access to ponds for schools and groups to learn about nature and wetlands
- An area of beauty, sensitively restoring the historic Coronation Avenue & creating new views across the water from Jubilee Row

Please join us next **Wednesday 27 May 9-11am for a virtual presentation followed by Q&A.**

We will talk you through the proposed improvements and the rationale behind them; share how the designs have responded to feedback and our plans for interpretation and community engagement.

We hope you can join us.

Regards

Zoe Sydenham
Natural Infrastructure Projects and Partnership Manager
