

Imperial College
London

COMMEMORATION DAY 2016

Wednesday 19 October
Royal Albert Hall, London

CONTENTS

01 President’s welcome

02 Chair’s welcome

03 Senior staff at Imperial

04 About the day

06 Imperial’s past and future

08 World-leading research at Imperial

10 Honorary degrees

12 Imperial College Medals

18 President’s Medals

22 Outstanding Student Achievement Award

24 The Imperial alumni community

29 Giving to Imperial

30 Faculty of Natural Sciences

40 Faculty of Engineering

52 Faculty of Medicine

PRESIDENT’S WELCOME

Professor Alice P. Gast

“Today is a time of celebration of excellence and accomplishment. It is a day that I hope you will remember forever.”

I warmly welcome our graduates, their family members and friends, and our honoured guests to the Imperial College London Commemoration Day.

Today is a special day for all of us. It is a time of celebration of excellence and accomplishment. It is a day that I hope you will remember forever.

Congratulations to the recipients of the degrees, awards and honours being conferred today. We are inspired by your accomplishments and excited by your potential to do even greater things in the future. You exemplify the talented people who drive Imperial’s success. I hope that as you settle into the ceremony, you are inspired by the rich history of this great university and by the amazing people receiving honours today.

I know that today’s ceremony marks the culmination of years of hard work and sacrifices that you and your families and friends have made. Your degree is only the beginning. It provides you with the opportunity to continue learning, to do important work with interesting people, to expand your intellectual horizons, and to help make the world a better place.

The work we do at Imperial brings great value to society through the new knowledge that we create and through the talented and excellent graduates we send into the world. Our impact is extended by our global network of collaborators and partners. I hope you take from this place a spirit of collaboration and the ability to build and contribute to teams.

I also hope that you take a moment today to recognise your mentors and teachers, and your family members and friends, who have contributed to your success. No matter how hard any of us works or how smart we are, we all need guidance and support. As you move on in your careers, think of ways to repay this support, perhaps by helping others and serving as mentors and role models.

I wish you all the very best for the future. Whatever path you choose, I hope that you maintain your curiosity, continue to seek new challenges and apply your talents to improving the lives of others. Congratulations again.

Alice P. Gast

CHAIR’S WELCOME

Sir Philip Dilley

“To those graduating today, I would emphasise that this is not the end of a journey, but the beginning of a new chapter in your life.”

Thank you for joining us today to celebrate the excellence of our undergraduate students, to honour staff and students who have made exceptional contributions to the College, and to recognise colleagues from outside of Imperial through honorary awards for contributions to their disciplines.

I have fond memories of when I crossed the stage of the Royal Albert Hall as a graduand of Imperial, with my friends and family watching. My degree in Civil Engineering gave me the skills and confidence to embark on a career that has taken me to countries across the globe. I am proud to now serve as Chair of the College’s governing Council.

Imperial’s Royal Charter of 1907 gave our university a distinct mandate focused on the application of education, research and scholarship. For generations, those with a degree from Imperial have made their mark in science, technology, engineering, medicine, business and education. Imperial graduates are an illustrious group.

To those graduating today, I would emphasise that this is not the end of a journey, but the beginning of a new chapter in your life. You have tackled advanced topics in your fields, gained new knowledge through your projects and research and furthered your ability to think critically. You are poised to apply what you have learned and make your mark in your chosen career.

You are also now part of the worldwide network of Imperial alumni that is a source of guidance, support and friendship. I encourage you to be an active part of this network over the coming years. We alumni are proud of what you have achieved and excited by the promise of your future achievements.

Congratulations again to all those graduating and receiving awards and honours today.

SENIOR STAFF AT IMPERIAL

SENIOR STAFF	COUNCIL MEMBERS
PRESIDENT Professor Alice P. Gast	CHAIR Sir Philip Dilley
PROVOST Professor James Stirling	EXTERNAL MEMBERS Mr Christopher Brinsmead Mr Iain Conn Mr Toby Courtauld Mr John Cullen Ms Rachel Lomax Ms Sara Murray Mr Jeremy Newsum Ms Alison Nimmo Professor Jeremy Sanders Mr Chris Williams
CHIEF FINANCIAL OFFICER Mr Muir Sanderson	EX-OFFICIO MEMBERS President, Professor Alice P. Gast Provost, Professor James Stirling Chief Financial Officer, Mr Muir Sanderson President of Imperial College Union, Mr Nas Andriopoulos
COLLEGE SECRETARY AND REGISTRAR Mr John Neilson	SENIOR STAFF REPRESENTATIVES Professor Nelson Phillips Professor Tom Welton Professor Jeff Magee Professor Gavin Screaton
VICE-PRESIDENT (ADVANCEMENT) Mrs Sarah Waterbury	ELECTED STAFF MEMBER Professor Neil Alford
VICE-PRESIDENT (COMMUNICATIONS AND PUBLIC AFFAIRS) Mr Luke Blair	THE CLERK TO THE COURT AND COUNCIL Mr John Neilson
VICE-PRESIDENT (INNOVATION) Professor David Gann	
VICE PROVOST (EDUCATION) Professor Simone Buitendijk	
VICE PROVOST (RESEARCH) Professor Nick Jennings	
DEAN OF THE BUSINESS SCHOOL Professor Nelson Phillips	
DEAN OF THE FACULTY OF ENGINEERING Professor Jeff Magee	
DEAN OF THE FACULTY OF MEDICINE Professor Gavin Screaton	
DEAN OF THE FACULTY OF NATURAL SCIENCES Professor Tom Welton	

ABOUT THE DAY

Graduations are a highlight of the College year, a time when we welcome back our graduating students, together with families and friends, to celebrate outstanding academic achievement.

Above: The exterior of the Royal Albert Hall, shown here in the late nineteenth century, is built from over 6 million red bricks and 80,000 blocks of terracotta.

Graduations for Imperial College London have taken place in the Royal Albert Hall for over 60 years. The Hall, which opened in 1871, was part of Prince Albert's grand vision for a cultural, scientific and artistic quarter in South Kensington. Given that Imperial also has its origins in this vision, it is fitting that the College should celebrate the accomplishments of its graduates here.

The order for the day is:

- 10.30:** Graduation ceremony for the Faculty of Natural Sciences
- 13.45:** Graduation ceremony for the Faculty of Engineering
- 17.00:** Graduation ceremony for the Faculty of Medicine

Celebratory canapé receptions will be held on campus following each ceremony at locations indicated on your reception tickets.

PHOTOGRAPHY

Please note that unauthorised video recording and photography are not permitted in the Royal Albert Hall. Professional photographers will be in the Imperial College Union during the day to take portrait photographs of graduands.

THE COLLEGE COAT OF ARMS

The College coat of arms was assigned by Royal Warrant on 6 June 1908. Coats of arms date back to the twelfth century, and continue to be used by well-established and respected corporate bodies as a mark of identification.

The shield incorporates the royal coat of arms and a book, representing knowledge. The motto, which reads *Scientia imperii decus et tutamen*, can be translated as 'Scientific knowledge, the crowning glory and the safeguard of the empire'.

THE IMPERIAL MACE

The Imperial College London Mace was presented to the College by the Goldsmiths' Company in 2009 in recognition of Imperial's status as a university in its own right. The generous gift reflects the livery company's longstanding relationship with Imperial and its predecessor institutions.

The intricate design of the Mace incorporates elements of the College's coat of arms and its motto. The helix-shaped stem represents human DNA or a chain of atoms in a spiral, providing a visual reference to the College's expertise in science and medicine.

The Mace is a focal point of the College's graduation ceremonies: it heralds the arrival of the Provost, President and Chair of Council during the Procession.

The Imperial Mace leads the procession of the Provost, President and Chair of Council.

Today, the Royal Albert Hall is the historic location for Imperial's postgraduate and undergraduate graduation ceremonies.

ACADEMIC DRESS

Academic dress has its origins in medieval Europe, when it identified the rank and profession of the wearer. Today, academic dress denotes the graduate's institution and the level of degree awarded.

The unifying theme of academic dress at Imperial is the colour purple. This is an homage to the work of Royal College of Chemistry alumnus Sir William Henry Perkin, who invented mauveine, the world's first synthetic purple dye, in 1856.

Graduands receiving their first degree wear black gowns and black hoods with white and purple lining. Recipients of the BSc (Engineering), BEng and MEng wear a grey collar; MBBS graduands wear a red collar; and BSc and MSci graduands wear a yellow collar.

IMPERIAL'S PAST AND FUTURE

The Queen's Tower, under construction in this image from 1886, was originally part of the Imperial Institute. Whilst the rest of the Institute was demolished from 1957 to 1968, the iconic tower was saved by a public campaign and is now in the custody of Imperial.

For over 100 years, Imperial College London has been at the forefront of scientific discovery and innovation, a unique institution dedicated to enduring excellence in research and education.

OUR HISTORY

Imperial was founded in 1907 with the merger of the Royal School of Mines, the Royal College of Science and the City and Guilds Central Technical College. During the latter half of the nineteenth century, each institution had played a crucial part in establishing science education and research in Britain, employing some of the finest minds in their respective areas of expertise. Each had also found a home in South Kensington, an area which, under the patronage of Prince Albert, had become a hub for science, culture and education.

The Royal Charter which formed the Imperial College of Science and Technology described its remit as "giving the highest specialised instruction, and providing the fullest equipment for the most advanced training and research in various branches of science, especially in its application to industry". The College swiftly began expanding its presence in South Kensington, constructing an extension to the City and Guilds College, a new building for the Royal School of Mines, and the Beit Buildings.

During the two world wars of 1914–18 and 1939–45, thousands of Imperial students and staff volunteered for service. On the home front, several of the College buildings were commandeered by the government and military. Staff and alumni undertook critical war-related

scientific research in fields including munitions, aeronautics and medicine.

The post-war period saw unprecedented growth at Imperial, as science and technology were seen as increasingly critical to facing the challenges of the twentieth century. New disciplines were introduced, including nuclear science and engineering, and computing and control.

After a series of mergers between the College and major medical schools, the Imperial College School of Medicine (now the Faculty of Medicine) was established in 1997. The Business School was granted a status equivalent to a College faculty in 2003, and a year later moved to its current location with the opening of the College Main Entrance.

As the College approached its centenary, the decision was made to withdraw from the University of London, a federation of which Imperial had been a part since 1908. The College's independence was formalised in 2007, and the first students to receive degrees of Imperial College London began their degrees later that year.

The I-HUB is the first building to open at Imperial's White City Campus. It will facilitate the co-location of start-ups, entrepreneurs, spin-out companies and major corporations with the College's academic community.

OUR FUTURE

Since 2007, Imperial College London has consolidated its position as one of the world's leading universities in the fields of science, engineering, medicine and business. Imperial's strength in these core disciplines has allowed it to push the boundaries of what a university can do, with the community working together to solve major global challenges.

Academics and students at Imperial are at the forefront of multidisciplinary research. They are supported by institutes and initiatives that bring researchers from across the College together. These include the Antimicrobial Research Collaborative, the Grantham Institute for Climate Change and the Environment, the Brevan Howard Centre for Financial Analysis, and the Energy Futures Lab. Collaborations such as the Lee Kong Chian School of Medicine in Singapore, which was established in 2010 with Nanyang Technological University, have shown how partnerships extend the impact of Imperial's work. In the future, the College will develop its partnerships with academic institutions, industries, governments and schools across the globe.

As the world changes, so will Imperial's education. Building on recent initiatives such as the new curriculum developed for the Dyson School of Design Engineering, Imperial will embed its education in a research-led, entrepreneurial environment and provide a broad range of services and support for students beyond their studies.

Imperial's newest campus at White City provides the College with the opportunity to develop new partnerships, support new areas of research, diversify revenue streams and give students entrepreneurial experience. The I-HUB (Translation & Innovation Hub) opens this month, providing facilities for close collaboration with partner institutions and companies. The Molecular Sciences Research Hub, with Chemistry research facilities at its core, will open in 2018.

The Molecular Sciences Research Hub, with Chemistry research facilities at its core, will open in 2018.

LEADING LIGHTS

Here are just some of the figures who shaped Imperial's history and changed the world during their time at Imperial.

SIR WILLIAM HENRY PERKIN

In 1856, while studying at the Royal College of Chemistry, Perkin discovered the first coal tar dye, mauveine. His discovery of the synthetic purple dye revolutionised fabric colouring, bringing bright colours to the masses for the first time, and transformed the science of chemistry.

DR MARTHA ANNIE WHITELEY

Whiteley joined the Royal College of Science as a teaching scholar in the Department of Chemistry in 1904, and by 1920 had progressed to the role of Assistant Professor. She was the first woman to hold a position on the teaching staff at the College, and was awarded the OBE in 1920 for the contribution of her research in the First World War.

SIR ALEXANDER FLEMING

In the course of his research at St Mary's Hospital, Fleming discovered the fungal mould *penicillium notatum*. His 1928 breakthrough, and the subsequent work of Sir Ernst Chain and Sir Hugh Florey to isolate and concentrate penicillin, was recognised in 1945 with a Nobel Prize for Physiology and Medicine.

SIR DEREK BARTON

Barton's work on the spatial arrangements of organic molecules and reactions mechanisms, was undertaken while he was Professor of Organic Chemistry between 1957 and 1972. His research transformed how chemists think about molecules in three-dimensional space, and he was awarded the Nobel Prize for Chemistry (with Odd Hassel) in 1969.

PROFESSOR JOAN WOODWARD

As a lecturer and subsequently professor in Industrial Sociology, Woodward undertook pioneering research into organisational structures in technology and production systems. Woodward Hall, a College Hall of Residence which opened in 2015, was named in her honour.

PROFESSOR DENIS GABOR

During the 1940s, Gabor began to experiment with holography, a process which allows the storage of propagating optical wavefronts for later reconstruction. For this research, he was awarded the Nobel Prize for Physics in 1971, the first engineer to receive the accolade.

PROFESSOR RODNEY ROBERT PORTER

Porter was Pfizer Professor of Immunology at St Mary's Hospital between 1960 and 1967, during which time he conducted research into the blood's immunoglobulin. In 1972, he was awarded Nobel Prize for Medicine of Physiology with G.M. Edelman for their work on determining the exact structure of an antibody.

Elizabeth the Queen Mother visits the College on Charter Day 1957 to open the Roderick Hill Building.

WORLD-LEADING RESEARCH AT IMPERIAL

Imperial is home to many world leading pioneers in science, engineering, business and medicine, and the alma mater to generations of award winners, government advisors, business leaders, politicians and entrepreneurs.

Charikleia Spathi, a PhD student from the Department of Civil & Environmental Engineering, won the 2015 Althea-Imperial Prize for her idea of a waterproof concrete additive to make buildings less vulnerable. The Althea-Imperial Prize, worth £10,000, supports innovative and entrepreneurial women students.

“Scientific and technological innovations shape the future of societies. Scientists can drive research breakthroughs and they can appreciate real market needs in their field of expertise.”
Charikleia Spathi, PhD student and 2015 Althea-Imperial prizewinner

Research at the College is multidisciplinary, with academics working with partners around the globe to tackle the greatest challenges we will face in the coming years, from sustainable healthcare to harnessing the power of the data revolution. Today’s graduates have been firmly embedded in a vibrant, research-led environment, learning alongside researchers who are experts in their fields.

Imperial researchers are making new breakthroughs every day. Here are some of the highlights of the past year.

Professor Julian Jones with bioglass, which mimics the qualities of real cartilage.

EDIBLE PLASTIC

Fields in the countryside are often lined with rows of hay bales wrapped in plastic.

Usually, all that plastic goes to landfill, but Imperial PhD students have come up with a novel way to tackle the issue. The student team created BioNet – an edible plastic wrapping that livestock can simply chew off before they get to the hay, straw or silage inside – preventing hours of unwrapping as well as unnecessary waste.

The team won the 2016 Imperial Showcase, the finale of an enterprise pre-accelerator programme for students to develop their entrepreneurial skills and develop their ideas for the benefit of society.

BOUNCING BIOGLASS

Professor Julian Jones has developed a glass-like material that mimics cartilage and potentially encourages it to re-grow. Bioglass, consisting of silica and a plastic, mimics the shock-absorbing and load-bearing qualities of real cartilage.

One formulation has the potential to encourage cartilage cells to grow in knees, previously not possible with conventional methods. Another substitute could replace damaged intervertebral discs in the spine, mimicking the qualities of real cartilage.

RESEARCH AT IMPERIAL IN NUMBERS

THE BRAIN ON LSD REVEALED

A team of Imperial scientists is investigating the effect of psychedelic drugs on the brain. The researchers have produced the first ever scans of the brain under the influence of LSD.

In the study, the team gave volunteers LSD in a specialist research centre, then used various scanning techniques to visualise how LSD alters the way the brain works.

The results suggested the drug causes many brain areas to work together, creating an altered state of consciousness.

The research team are now investigating whether the compound could have therapeutic potential as a treatment for depression.

HELPING HANDS

Scientists have developed sensor technology that enables a user to control a robotic hand via arm movements and muscle vibrations.

The sensor detects signals from tiny vibrations produced by muscle fibres when they flex. The vibrations are detected by the sensor and passed on to the robotic hand, which interprets them as commands. The team led by Dr Ravi Vaidyanathan believes the sensor could also control other technologies.

bit.ly/imperial-robotic-hand

Alex Lewis, who lost both legs, his right arm and the use of his left arm following a rare infection, conducts a preliminary demonstration of the robotic arm with Dr Ravi Vaidyanathan.

USING GENETICS TO TACKLE MALARIA

Malaria is still a major killer, and a team of Imperial researchers is taking a radical approach to tackling the disease.

They are targeting three species of mosquito that carry malaria by genetically modifying them. They have disrupted a gene in one species, making females infertile, and used another clever genetic trick called 'gene drive' to make sure the trait is passed on to nearly every offspring, thereby spreading it through the population.

The hope is that local populations of mosquitos will collapse until there are no longer enough to transmit the disease. The technology is still many years away from being trialled in the field, but laboratory tests have shown it to be highly effective.

HONORARY DEGREES

Imperial College London honorary degrees are conferred on persons of conspicuous merit who are outstanding in their fields.

The Admiral of the Fleet The Lord Boyce

Lord Boyce is a crossbench member of the House of Lords. He is Chair of the Advisory Board for the Royal British Legion Centre for Blast Injury Studies at Imperial.

Lord Boyce joined the Royal Navy in 1961 and during his 42 years of service, he commanded HM Submarines Oberon, Opossum and Superb and the frigate HMS Brilliant. He became First Sea Lord in 1998 and Chief of Defence Staff in 2001.

Following retirement, Lord Boyce was awarded the honorary appointment of Admiral of the Fleet. In 2004 he was appointed Lord Warden and Admiral of the Cinque Ports and Constable of Dover Castle. He is also King of Arms of the Order of the Bath, and a Knight Companion of the Order of the Garter. Lord Boyce holds honorary doctorate degrees from the University of Portsmouth, the University of Kent and Canterbury Christ Church University. He is Chairman of the HMS Victory Preservation Company and has served as Trustee of the National Maritime Museum, Chairman of the Royal National Lifeboat Institution and Patron of the Forces in Mind Trust. He is Chairman of the D Group Advisory Board and formerly a Non-Executive Director of WS Atkins PLC and an Advisor to Computer Sciences Corporation.

Professor Yves Lévy

Professor Yves Lévy is Chief Executive Officer and Chairman of the French National Institute of Health and Medical Research (INSERM). He is Professor of Clinical Immunology at Henri Mondor Hospital/Université Paris Est Créteil and leads Aviesan, the French Alliance for Health and Life Sciences.

Professor Lévy's research is concerned with the development of the immune system and its pathology. He has coordinated and developed national and international clinical trials of immunotherapies and vaccines for immunodeficiencies and infectious diseases, including HIV/AIDS. Professor Lévy has worked with INSERM since 1985. He led a team focused on HIV physiopathogenesis, immune interventions and vaccines. He served as Director of the INSERM unit in Dallas, Texas from 2010 to 2012 and, prior to his appointment as CEO, was Head of the Clinical Department of Immunopathology at Henri Mondor Hospital. Professor Lévy created the Vaccine Research Institute, a network of 18 research teams and key international opinion leaders from institutions in France and the US aimed at developing effective vaccines against HIV.

Professor Lévy is chair of the Immune-Based Therapies Committee and Scientific Director of the HIV Vaccine Programme at the French Agency of Research Against AIDS and Hepatitis (ANRS). He is a member of the WHO Vaccine Advisory Committee and the Council of the Global HIV Vaccine Enterprise. He has served as Vice Dean of the Medicine Faculty of Université Paris Est Créteil and as Special Councillor of the French Minister of Higher Education and Research.

IMPERIAL COLLEGE MEDALS

The Imperial College Medal is awarded for meritorious or praiseworthy service to the College or for having otherwise enhanced its reputation, mission and objectives.

Mrs Ezara Bird

Mrs Ezara Bird is a Senior Lab Aide in the Cancer Division, Department of Surgery & Cancer, Faculty of Medicine.

Mrs Bird is one of the most respected and valued members of staff in the Cancer Division. She has provided excellent support for the Division's research since its beginning as the small section of Cancer Medicine. The type of basic laboratory support that Mrs Bird undertakes is vital to the overall work of the Department. Her loyalty and commitment has established the basis for the department's successful research and for training the researchers of the future.

Mrs Bird's also supports an orphanage in her home country of Thailand. She often spends her holidays there, working with children who have HIV infections and have been abandoned by their families.

Professor Justin Cobb

Professor Justin Cobb was appointed as Professor of Musculoskeletal Surgery at Imperial in 2005.

Professor Cobb researches skeletal joints, aiming to understand how they are damaged and how they can be repaired. He and his team are using a combination of 3D imaging, 3D printing and robotics to perform a minimally invasive repair on damaged joints. Professor Cobb also spearheaded the approach to Imperial alumnus Michael Uren and the Michael Uren Foundation which led, in 2014, to a donation of £40million – the most generous in Imperial's history. This is supporting construction of the pioneering Michael Uren Biomedical Engineering Research Hub, at the White City Campus, to be named in honour of the donor.

Professor Cobb is advisor to the board of Stanmore Implants. He is a civilian advisor in orthopaedics to the Royal Air Force. He is on the staff of King Edward VII hospital for Officers, and is Orthopaedic Surgeon to Her Majesty the Queen.

Dr Shaun Crofton

Dr Shaun Crofton first came to Imperial as a student in 1968 to study for a BSc (Eng) in Metallurgy and, apart from a year spent in industry in Germany, he remained at the College until his retirement in 2015.

Throughout his career, Dr Crofton was a dedicated and inspirational teacher, receiving multiple awards, including the President's Award for Excellence in Teaching and an award for Teaching Excellence in Engineering Education. He was Senior Tutor in Mechanical Engineering for more than ten years, and combined sympathy and concern for student welfare with valuable guidance for students on academic matters.

Dr Crofton acted as senior user coordinator for Mechanical Engineering during a major relocation project, making many interventions that prevented costly errors and kept the project close to its target completion time. Dr Crofton also held the role of Disability Officer for Mechanical Engineering, facilitating student support within the department.

IMPERIAL COLLEGE MEDALS

**The Baroness
Manningham-Buller**

Baroness Manningham-Buller is a Crossbench member of the House of Lords. She joined Imperial's Council in 2009 and served as Chair of the Court and the Council from 2011 until 2015. She is currently Chair of the Wellcome Trust.

Baroness Manningham-Buller joined the Security Service (MI5) in 1974. She was promoted to its Management Board in 1993 and led the Service's work on technical intelligence collection surveillance, finance, IT and Irish terrorism. She became Deputy Director General in 1997, in charge of the Service's operations, before being appointed Director General in 2002.

Baroness Manningham-Buller was awarded the Dame Commander of the Bath in the Queen's Birthday Honours in 2005. She is currently a member of the House of Lords Select Committee on Science and Technology. In 2014 Her Majesty the Queen made her a Lady of the Garter.

Ms Doris Pappoe

Ms Doris Pappoe is Postgraduate Administrator in the Department of Chemistry. This year she celebrates 30 years of service at Imperial.

Ms Pappoe joined the Department of Chemistry as a Departmental Secretary in 1986, becoming the Departmental Postgraduate Secretary two years later. She took up her current role as Postgraduate Administrator in 2011. She has provided support and advice to over 1,000 research students, beginning with their initial applications to Imperial. During their time at Imperial Ms Pappoe encourages postgraduate students to make the most of all the opportunities open to them in College. She continues to support postgraduates until their graduation ceremonies, which she always attends.

In 2015 Ms Pappoe was awarded a Faculty of Natural Sciences Prize for Excellence in the Support of Teaching and Learning. She is a member of the Imperial As One advisory group, which works to support and promote an inclusive workplace culture.

IMPERIAL COLLEGE MEDALS

Ms Lisa Phillips

Ms Lisa Phillips is a Senior Human Resources Manager in the Human Resources Division. In this role she is responsible for the strategic direction of the Support Services human resources and for overall management of the HR team.

In 1985 Ms Phillips joined the Personnel and Estates Office of the Royal Postgraduate Medical School, now part of Imperial. Her 30 years of service to the College have been characterised by her hardworking and conscientious approach, and the consistently high standard of her work. She is tenacious and always works proactively around any barriers to get a job done, and her work is valued by everyone she works with.

Ms Phillips is also a member of Imperial's redundancy avoidance working group which works with joint trade unions to ensure a consistent, transparent and fair approach to change and restructuring.

Mrs Margaret Quinn

Ms Margaret Quinn is the Hall Supervisor at Imperial's Evelyn Gardens.

Ms Quinn has worked in the halls of residence at Evelyn Gardens for the past 28 years. During that time, she has consistently provided first-class service to students and visitors on a daily basis. The halls in Evelyn Gardens comprise of 34 houses set around a Victorian square, providing accommodation for over 600 first year undergraduate students. Over the years, Margaret has welcomed, assisted, and supported nearly 17,000 Imperial students.

Margaret has also been instrumental in the development of Evelyn Gardens. She has played a crucial role in implementing systematic improvements in the overall running of the halls.

PRESIDENT'S MEDALS

The President's Medals are awarded to recognise staff members who have made outstanding contributions to research, external engagement, innovation, and research support or supervision.

**PRESIDENT'S MEDAL FOR
OUTSTANDING CONTRIBUTION
TO TEACHING EXCELLENCE**

Professor Martin Blunt is Professor of Petroleum Engineering in the Department of Earth Science and Engineering at Imperial. He was Head of Department between 2006 and 2011.

Professor Blunt's research interests are in multiphase flow in porous media with applications to geological carbon storage, oil and gas recovery, and contaminant transport and clean-up in polluted aquifers. Professor Blunt is an outstanding teacher who has led a transformation of teaching culture in the department. During his time as Head of Department, Professor Blunt supported the setting up of the MSc in Petroleum Geophysics, and the transformation of the BSc and MSc Geophysics courses.

Professor Blunt acted as Principal Expert Witness for BP in phase two of the Deepwater Horizon trial. He frequently teaches graduate students at the Massachusetts Institute of Technology and Stanford University on short courses in flow and porous media. He is on the editorial boards of Transport in Porous Media, Water Resources Research and Advances in Water Resources.

**PRESIDENT'S MEDAL FOR
EXCELLENCE IN PASTORAL CARE**

Dr Benita Cox is a Senior Tutor and the Programme Director for Imperial College Business School's MSc International Health Management programme.

Dr Cox's research interests have focused on the role of information systems in healthcare delivery, in particular, the impact of information and communicating technologies on healthcare practice. For more than 20 years, Dr Cox has been the Business School's Senior Tutor. Through this work, she has personally helped thousands of students and colleagues. She understands the unique pressures and expectations faced by students of different cultures and supports them with the distinct issues that they face.

Dr Cox's College responsibilities also include Disabilities Liaison Officer, Disability Action Committee member, Complaints and Appeals Task Group member, and Academic Mental Health Champion. She is on the Executive Board of the UK Health Informatics Society, and an Editor of UK Health Informatics Today and a member of the Editorial Board of the Journal of Healthcare Informatics.

PRESIDENT'S MEDALS

PRESIDENT'S MEDAL FOR SUPPORTING THE STUDENT EXPERIENCE

Mrs Louise Green is the Undergraduate Office Manager for the Department of Civil and Environmental Engineering.

Mrs Green has taken a leadership role in establishing the Undergraduate Office as welcoming place for students, as well as the source of course information and helpful personal advice at all times. She has been hugely supportive the student Civil Engineering Society (CivSoc), helping to establish it as one of the most active student-led societies in the Faculty. There has been a palpable, transformative and positive step-change in the relationship between students and staff in the department thanks to Mrs Green's efforts.

In her role as Disabilities Liaison Officer, Mrs Green has conducted herself with sensitivity and diligence, to the benefit of dozens of students with a range of learning, emotional or physical disabilities.

PRESIDENT'S MEDAL FOR OUTSTANDING CONTRIBUTION TO TEACHING EXCELLENCE

Dr Sonia Kumar is Director of Undergraduate Primary Care Education in the Department of Primary Care and Public Health at Imperial. She has also worked as a GP in South London for 15 years.

Dr Kumar has made an outstanding contribution to teaching on the Imperial MBBS course. During the three years since Dr Kumar took up her post, her teaching team has doubled in size with funding from Health Education England and the National Health Service. She has been directly involved in the design, development and evaluation of eight new GP attachments on the MBBS programme, as well as maintaining the quality of the existing courses.

Dr Kumar was listed as one of Pulse magazine's GP rising stars in 2015 and was awarded the Imperial President's Medal for outstanding contribution to teaching in 2016, with three of her team receiving President's Awards for teaching in the same year.

PRESIDENT'S MEDAL FOR SUPPORTING THE STUDENT EXPERIENCE

Ms Susi Underwood has been the Postgraduate Administrator in Chemical Engineering for more than 10 years.

Ms Underwood's work is exemplary in its quality and professionalism, and she is known for her dedication to student welfare. Ms Underwood manages the PhD experience from initial enquiry through to graduation, but she is particularly dedicated to admissions and student milestones following enrolment. Her support for the student experience goes far beyond her required duties to include providing pastoral support to students on a range of personal, medical, financial and academic problems, and supporting and attending student organised social events.

Ms Underwood is a College Events Maker and has volunteered each year at the Imperial Festival, undergraduate open days and moving in weekend. She is a member of the Imperial College Choir.

OUTSTANDING STUDENT ACHIEVEMENT AWARD

Outstanding Achievement Awards are awarded to those students who have achieved excellence in extramural activities that bring credit to the College.

Mr Usama Syed

Mr Usama Syed is a graduate of the Imperial College School of Medicine.

In 2015, he established MedTech Imperial, a society which brings together students from medical, engineering and computing departments at the College. MedTech has hosted events and conferences and supported start-up groups within the community. Mr Syed has also prepared material to help students at other universities begin their own MedTech societies.

Mr Syed has worked with colleagues to develop an app which can streamline the provision of feedback from front-line hospital staff to senior medical directors. He has written articles for the College website on topics relating to medicine, and he has served as a writer and editor of a public health-oriented newsletter for a health centre in Clapham. In addition, Mr Syed was a prizewinner in an International Surgical Essay Prize competition, for his entry on minimally invasive surgery.

“Don’t second guess what other people expect of your career. Make choices that mean you can do what you enjoy every step of the way and the rest will fall into place.”

Dr Sir Michael Jacobs (PhD Clinical Medicine 1998)

THE IMPERIAL ALUMNI COMMUNITY

Congratulations on your graduation and a warm welcome to Imperial’s alumni community.

Ms Nicola Pogson,
Director of Alumni
Relations

As you cross the stage of the Royal Albert Hall, you will join a powerful and lifelong global network of more than 190,000 leaders and innovators – this connection will endure far beyond the years you have spent on campus.

Wherever your path takes you after today, your life will be shaped by your Imperial education, the friendships you have formed, and your experiences here.

As we talk with alumni around the world, we are shown again and again the potential that a vibrant and connected community holds for both the College and its alumni. Imperial’s five-year strategy acknowledges the importance of our staff, students, alumni and friends in helping humanity address the changes and challenges ahead.

Whilst recognising the many achievements of our alumni community to date, our vision is to build a more globally connected network. Over the last

year we have worked closely with our international groups, and our President has attended alumni receptions in China, Malaysia, Singapore, Saudi Arabia, the US, India, Australia, France, Germany and Ireland. Many more events have been run by geographic groups for their local alumni. Closer to home, alumni have attended events around the UK including the annual Alumni Weekend, professional networking events and reunions. Many alumni have spoken about how much they personally have benefitted from remaining connected with their classmates and forming new friendships and professional connections with their local alumni network.

One of the key themes emerging from these events and from meeting with alumni is the need to build stronger links between different generations, ensuring that recent alumni benefit from the expertise, career insights, knowledge and connections of alumni well established in their careers. In response to this feedback, we are developing a programme for recent graduates, which will feature workshops and events tailored to your needs, and we are encouraging our international groups to reflect this programme. We were pleased to launch the first networking event for recent graduates earlier this month so do keep an eye out for future activities and initiatives.

As you embark on the next step of your journey, I encourage you to make the most of your Imperial connections. By keeping in touch you can take advantage of the benefits and services offered to the community, and tap into the experience of alumni who have already made strides in your professional field. And in turn, you can play your part in building a strong alumni community through the gift of your time, expertise and support, to help both the students that follow in your footsteps and fellow alumni.

Below: Alumni and friends of the College meet Professor Alice Gast at a reception in Dublin.

Left: Mathematics alumni meet current students at a networking and careers event held in South Kensington.

Above: Alumni, students, parents and friends gather in Malaysia to meet Professor Gast and the Imperial team.

Imperial alumni live in 200 countries

Top five countries lived in by Imperial alumni:
1. UK
2. China
3. US
4. Greece
5. France

YOUR CONNECTION LASTS A LIFETIME

It’s simple to play an active role in building a stronger and more connected community: whenever you move home or change jobs, update your contact details and professional information with the Alumni Office. Start today by visiting the Alumni Office stand at Gown Collection to update your details and collect your Graduation 2016 pin. Find out about the services and benefits available to you as an alumnus on our website:

imperial.ac.uk/alumni

RE-LIVE YOUR SPECIAL DAY

Watch footage of your graduation online from a few days after the ceremonies at: imperial.ac.uk/blog/graduation

“It is a fast-moving world out there. It is fascinating and it is daunting. You have the incredible privilege to face it as part of an extraordinary community – but also the ability to shape it. Make this privilege count: make the most out of every interaction, every new challenge, every pitfall.”

Thanos Kosmidis (MEng Computing 2000)

MEET YOUR FELLOW ALUMNI

From conserving history to treating and preventing epidemics, Imperial alumni are making an impact around the world.

Dr Eleanor Schofield

MEng Aerospace Materials 2002, PhD Materials Research 2006

Dr Eleanor Schofield is the Head of Conservation and Collections Care at the Mary Rose Trust. The Mary Rose is a Tudor ship, which sank in Portsmouth Harbour in 1545 and was discovered in 1971.

"I manage a team of conservation, maintenance and collections staff, who look after our artefacts, monitor the ship's hull and maintain the environmentally controlled conditions they all reside in.

I liaise with universities (including Imperial) and apply for funding with them for PhD students and postdocs to work on specific research projects, or liaise with existing projects where relevant.

My job also involves some practical work on the ship, getting all the safety gear on and collecting samples to analyse. The hull of the ship was sprayed for years with a polymer to reinforce the wood, and is now drying under controlled conditions. During this phase we have to monitor it very carefully for chemical, mechanical and biological stability.

Getting people interested in science, and not scared of it inspires me. I like that I get to break down barriers and stereotypes of people who work in science. I love getting to work on something in science that people can really relate to. It's great talking to people about the Mary Rose, and seeing them realise that it's science and it's exciting!"

Mr Rob Cromwell

BSc Computing 2010

Rob Cromwell is a keen advocate of start-ups and co-founder of Inkling, a company that enables leading companies such as Pearson and Wiley to create interactive, mobile content to share with their customers.

"We want to be the standard for how knowledge that matters is built, read and shared. That could be anything from an academic text book, to training a barista on how to make a pumpkin spiced latte, to a sexual harassment training course. It's motivating to think that on a daily basis we have literally millions of people learning from content that was produced on our platform. It feels like we're making a definite impact.

I spend a lot of time on developing the culture at the company. We have a culture of conscious business. It's a lot about humility, integrity – following through on your commitments and being accountable. It takes a lot of work to shape that and make sure people understand it.

It was amazing to be in a place as diverse as Imperial. It's pretty unique in that way. In Halls I lived with people from Yorkshire, Malaysia, St Andrews, and France, amongst other places. The diversity was so great."

Alumni and visitors enjoy the sunshine at Beit Quad during the 2016 Alumni Weekend at the Imperial Festival.

"I like that I get to break down barriers and stereotypes of people who work in science."

Dr Eleanor Schofield (MEng Aerospace Materials 2002, PhD Materials Research 2006)

Dr Gareth Davies

BSc Physics 1991, PhD 1994

Dr Gareth Davies is an inventor and novelist, and the CEO of Kwiziq, a software programme that uses artificial intelligence to teach languages.

"We started out to create a language learning system that was smart and could adapt itself to you. There are lots of wonderful resources available on the internet, but they tend to serve either absolute beginners or are one-size-fits-all courses that don't properly fit anyone. Our programme learns what you know, then works out a personalised study plan for you.

I use things I learned in physics almost daily. That study taught me how to think strategically and how to solve a wide variety of problems – it was a lot more than just quantum mechanics and relativity!

Highlights so far definitely include Bill Gates presenting one of my inventions from a previous start-up during the Consumer Electronics Show, and appearing on BBC Tomorrow's World (twice), but all that is thanks to the amazing teams of people I've had the pleasure of working with. As founder and spokesman I often get the credit but the reality is a lot of brilliant people work really hard together as team to take an initial idea or prototype of mine and realise it. It's been far from easy (we were entirely self-funded until 2015) and I'm really proud of everyone I've had the privilege to work with, past and present."

MEET YOUR FELLOW ALUMNI

Ms Claire Cockerton

MBA 2010

As an entrepreneur and specialist in tech clusters, innovation services and startup eco-systems, Claire Cockerton has founded businesses in financial services, technology innovation and sustainable architecture.

"I chose the Imperial MBA because it appealed to my entrepreneurial spirit. Imperial fosters innovation by drawing on an array of assets: high-tech engineering labs, Imperial Innovations venture fund, a business incubator, and partnerships with Design London and Royal College of Art. It represents the confluence of forces between design and engineering, hard and soft technology, academia, and industry. I felt it would give me a well-rounded approach to business and a diverse network.

The MBA was a fantastic transition into industry. My final project was a thesis paper on business incubators and a hands-on consulting project for Richard Branson's Virgin Unite – I helped set up the Branson Centre for Entrepreneurship in Johannesburg. Back in London, I was part of the Guardian Media Group Digital First Transformation. I then set up Level 39, a technology accelerator for financial services companies and at the same time founded ENTIQ, which specialized in fostering innovation in the banking and technology sectors.

Since then ENTIQ has launched Innovate Finance, the UK's new trade body for FINTECH firms; Cognicity, a smart city accelerator Programme; and is now launching the largest innovation centre on the Queen Elizabeth Olympic Park."

Johnny Kwan (Chemical Engineering 1978, MSc Management Science 1979) discusses sustainable business with alumni and their guests during the Alumni Weekend at the Imperial Festival.

Dr Sir Michael Jacobs

Clinical Medicine Research 1998

Dr Sir Michael Jacobs was awarded a Knighthood for services to the prevention and treatment of infectious diseases, recognising his role in the treatment of Ebola cases in the UK.

"As a physician at the Royal Free London NHS Foundation Trust, I lead a team of seven consultants to provide a clinical service dealing with infections of any kind. I'm also the Programme Director for High Consequence Infectious Diseases for NHS England. My role there is to put in place systems and processes to ensure our preparedness for any dangerous infections in the UK.

Our team treating the Ebola patients during the epidemic functioned fantastically. We were trained and prepared because we knew that it would happen sometime. We didn't know that it would be Ebola and we didn't know when, but we knew it would happen. We function as a hospital within a hospital, with a big team of doctors, nurses, pharmacists, physiotherapists and so on, and everyone was ready.

We knew so little about Ebola and we were learning as we went, using new treatments, things that had never been used in humans before. We had to disassociate from it all and just concentrate on the medicine.

There was a huge, courageous humanitarian response during the epidemic, with hundreds of people travelling to Sierra Leone to help. To my surprise, our unit in the Royal Free became very important to them."

GIVING TO IMPERIAL

2015-16, over 7,400 Imperial alumni and friends donated to the College, raising over £20 million. We invite you to join Imperial's inspiring giving community.

Jonathan Palmer, a beneficiary of the President's Scholarship Fund, graduates today with a BSc in Biochemistry. Pictured here in 2011, during his first year at Imperial.

Last year, over 4500 Imperial alumni made a gift to support your education

Imperial is indebted to many of its alumni, generations of whom have helped in whatever way they have been able by providing the funding for our **President's Scholarships, Student Support Funds, Faculty Deans' Funds,** and **Outreach work,** among other key initiatives. As you graduate and join our alumni community, we would love to welcome you to this proud tradition of supporting the next generation of Imperial students.

Your donation to Imperial can be used in many ways. You may wish to support an area of College life that you have particularly enjoyed, or a College fund that you yourself have benefitted from as a student.

EVERY GIFT MATTERS

The cumulative value of many graduates leaving a small gift as they leave Imperial can make a profound difference.

- 5 graduate gifts of £5** can pay for a weekly student travel card.
- 12 graduate gifts of £5** can pay for a student counselling session.
- 15 graduate gifts of £5** can pay for a day of scientific discovery at White City, for a prospective Imperial student.
- 50 graduate gifts of £5** can pay for a modernised workspace in the Central Library.
- 100 graduate gifts of £5** can support an Imperial student in unexpected financial hardship.

Thank you for helping to support the students who come after you.

To make your gift, or to find out more:

"Imperial is a place where students can realise their potential. My experience here is one that I will never forget."

Emma Dixon (MEng Aeronautics 2016)

Emma Dixon, a beneficiary of the President's Scholarship Fund, graduates today with an MEng in Aeronautics. Pictured here in 2011, during her first year at Imperial.

FACULTY OF NATURAL SCIENCES: ORDER OF CEREMONY AND ORDER OF PROCESSION

Order of Ceremony

10:30 Faculty of Natural Sciences

FANFARE

STUDENT ORATOR

President, Imperial College Union
Mr Nas Andriopoulos

ADDRESS

President, Professor Alice P. Gast

PRESENTATION OF GRADUATES

Presentation of Graduates from the Faculty of Natural Sciences to whom the Associateship of the Royal College of Science and first degrees of the University have been awarded

MUSICAL INTERLUDE

Zadok the Priest
Music and words by G. F. Handel

PRESENTATION OF THE IMPERIAL COLLEGE MEDAL

The Dean, Faculty of Natural Sciences, requests the President to award the Imperial College Medal to:

Ms Doris Pappoe

Ms Lisa Phillips

Mrs Margaret Quinn

VALEDICTION

Chair of the Council, Sir Philip Dilley

GOD SAVE THE QUEEN

RECESSION

RECEPTION

Conductor of the Orchestra, Richard Dickens
(Director of Music)

Organist, Andrew Lucas

Conductor of the Choir, Dr Colin Durrant

Order of Procession

The company rises when the Procession enters the hall and remains standing until the Chair of the Council is seated.

FIRST GROUP

Student Presidents

SECOND GROUP

Faculty Operating Officer, Nazia Hirjee

Wardens

College Tutors

Readers

Senior Lecturers

Lecturers

THIRD GROUP

Academic Registrar, Mr David Ashton

Vice-Provost (Education), Professor Simone Buitendijk

Dean, Faculty of Natural Sciences, Professor Tom Welton

Head of Department, Chemistry, Professor Alan Armstrong

Head of Department, Life Sciences, Professor Murray Selkirk

Head of Department, Mathematics, Professor Richard Craster

Head of Department, Physics, Professor Jordan Nash

Professors of the Faculty of Natural Sciences

Winners of the Imperial College Medal: Ms Doris Pappoe, Ms Lisa Phillips and Mrs Margaret Quinn

FOURTH GROUP

College Secretary and Registrar and Clerk to the Court and to the Council, Mr John Neilson

Lay and Non-Academic Members of the Court

FIFTH GROUP

Provost, Professor James Stirling

President, Professor Alice P. Gast

Chair of the Council, Sir Philip Dilley

FACULTY OF NATURAL SCIENCES: DEAN’S WELCOME

Here you are at last at your graduation. Well done! This is a great achievement. To get a degree from Imperial College London is not easy; it requires dedication, hard work and a sustained intellectual effort over many years.

You have risen to that challenge and you have excelled. I am honoured to have this opportunity to celebrate with you today, and to offer my sincere congratulations.

Today you can take a breath, relax and think about how successful you are. As you walk about the College, the new first years who joined us last month will be looking at you and imagining themselves in your shoes – an Imperial graduate. This is what you wanted to be, and you have done it. It is time to celebrate.

I am sure that as you reflect on your years of study here at Imperial you will realise just how much you have changed, as a person and a scholar. The experiences that you have had during your time here, sometimes the tough ones more than the easy ones, will help to prepare you to make a success of your next steps, whatever these are, just as you have made a success of your studies. I wish you every good fortune in whatever you choose to do next. As a graduate of Imperial College London you do have choices, you are not constrained in what happens next, so make these wisely. My advice is to choose whatever will bring you joy. I have stuck with this throughout my career and I am absolutely sure it was the right thing to do.

As much as today is a celebration of your achievement, you did not do this alone. Take a moment to think of all of those who have helped you along the way. You will all have favourite lecturers, but these are just part of the incredible community of staff, many of whom work in backroom offices and you never see, who support your studies here. Today is a day that they cherish and they all celebrate with you. Please join me in thanking these people for everything that they do. You will also have been supported by your friends and family. They have been with you throughout this experience; don't forget to thank them for their love and support.

Finally, although most of you are moving on from Imperial, you are not leaving us. You will always be a part of Imperial and you will always be welcome. No matter where you go, you will find other Imperial alumni everywhere. You will always share a bond with these people built on your shared experience. This is a network that you will automatically be part of. I get to meet with our fantastic alumni at their events all over the world and I am always gladdened by the camaraderie that they share. It is also great to see them back here, perhaps when they are acting as a mentor for one of our current students. It's always great to hear of their successes.

I congratulate you once again on your success, and wish you the best for the future, wherever your ambitions take you.

“You will always be part of Imperial and you will always be welcome.”

Research income in 2014-15: £75 million

Number of staff: 1,419

Number of students: 4,787

Right: Researchers from the Department of Life Sciences are breeding mosquitos and analysing their interactions with the malaria parasite Plasmodium, in the hope of finding new ways to tackle the disease.

Far right: Professor Alan Armstrong, from the Department of Chemistry, is working with researchers across the college as part of EMBRACE, a project which aims to build a cross-disciplinary approach to antimicrobial resistance research.

A team of Imperial researchers, including lead engineer Ms Helen O'Brien and Professor Tim Horbury, have built a magnetometer to measure the Sun's magnetic field. The device will be launched into space on NASA's Solar Orbiter in 2018.

FACULTY OF NATURAL SCIENCES: GRADUATE PRIZEWINNERS 2016

The following awards and prizes are given to students with a record of exceptional achievement in scholarship in the Faculty of Natural Sciences.

Jacek Lapinski, a PhD student in the Department of Chemistry, works on improving PCB Planar Plates, a component in polymer electrolyte fuel cells.

- Abdus Salam Undergraduate Prize**
Martik Aghajanian
- Beloff-Chain Prize**
Fu Quah

Students with Professor Pietro Spanu, Professor of Molecular Plant Pathology in the Department of Life Sciences. Professor Spanu sequences genomes of plant diseases to help understand the evolution of bacterial and fungal infections that can decimate crop yields.

FACULTY OF ENGINEERING: ORDER OF CEREMONY AND ORDER OF PROCESSION

Order of Ceremony

13:45 Faculty of Engineering

FANFARE

STUDENT ORATOR

President, Imperial College Union
Mr Nas Andriopoulos

ADDRESS

President, Professor Alice P. Gast

PRESENTATION OF GRADUATES

Presentation of graduates from the Faculty of Engineering to whom the Associateship of the City and Guilds of London Institute and Royal School of Mines and first degrees of the university have been awarded

MUSICAL INTERLUDE

Zadok the Priest
Music and words by G. F. Handel

PRESENTATION OF THE RECIPIENTS OF THE PRESIDENT’S MEDAL

The Vice-Provost (Education) presents:

Professor Martin Blunt, Outstanding Contribution to Teaching Excellence

Mrs Louise Green, Supporting the Student Experience

Ms Susi Underwood, Supporting the Student Experience

Conductor of the Orchestra, Richard Dickens
(Director of Music)

Organist, Andrew Lucas

Conductor of the Choir, Dr Colin Durrant

PRESENTATION OF THE IMPERIAL COLLEGE MEDAL

The Dean of the Faculty of Engineering requests the President to award the Imperial College Medal to:

Dr Shaun Crofton

PRESENTATION OF THE HONORARY GRADUATE

The Dean of the Faculty of Engineering requests the President to confer the Degree of Doctor of Science honoris causa of Imperial College London on The Admiral of The Fleet The Lord Boyce

VALEDICTION

Chair of the Council, Sir Philip Dilley

GOD SAVE THE QUEEN

RECESSION

RECEPTION

Order of Procession

The company rises when the Procession enters the hall and remains standing until the Chair of the Council is seated.

FIRST GROUP

Student Presidents

SECOND GROUP

Faculty Operating Officer, Richard Martin

Wardens

College Tutors

Readers

Senior Lecturers

Lecturers

Winners of the President’s Medals:

Professor Martin Blunt

Mrs Louise Green

Ms Susi Underwood

THIRD GROUP

Academic Registrar, Mr David Ashton

Vice-Provost (Education),
Professor Simone Buitendijk

Dean, Faculty of Engineering, Professor Jeff Magee

Associate Provost (Academic Planning),
Professor Neil Alford

Director of the Institute of Security Science and Technology, Professor Chris Hankin

Associate Dean for Learning and Teaching,
Dr Lorraine Craig

Heads of Department

Professors of the Faculty of Engineering

Honorary Graduate, The Admiral of the Fleet
The Lord Boyce

Winner of the Imperial College Medal,
Mr Shaun Crofton

FOURTH GROUP

College Secretary and Registrar and Clerk to the Court and to the Council, Mr John Neilson

Lay and Non-Academic Members of the Court

FIFTH GROUP

Provost, Professor James Stirling

President, Professor Alice P. Gast

Chair of the Council, Sir Philip Dilley

FACULTY OF ENGINEERING: DEAN'S WELCOME

I would like to congratulate you on your exemplary achievement, and thank your families for their support during your time here. Your hard work, determination and talent have made a lasting mark in your departments and the Faculty of Engineering.

Professor Jeff Magee

As you leave the Faculty of Engineering and Imperial College London please do not view this as goodbye, but rather the start of a new journey. You are now part of the alumni community of over 80,000 engineering graduates, who are shaping industry, conducting ground-breaking research and inspiring the next generation of engineering leaders. We encourage you to stay involved and keep pushing us to achieve greatness.

Your time at Imperial has seen growth within the Faculty and profound advances in engineering and science. We have established the new Dyson School of Design Engineering through a generous gift from the James Dyson Foundation.

The School offers undergraduate and postgraduate courses in design engineering, global innovation design and innovation design engineering. We have also launched the Data Science Institute, which brings advanced computational and datamining methods to bear on major challenges in healthcare, urban living and beyond. Finally, we have cemented our place as a leader in biomedical engineering with our vision for the state-of-the-art Michael Uren Biomedical Engineering Research Hub at the new White City Campus.

What makes an Imperial Engineer unique is our strong focus on translation, making lives better and pushing boundaries. We achieve this through entrepreneurship, creativity and design. The Imperial degree and your association with the City & Guilds Institute and the Royal School of Mines sets you apart. It is now on you to make an impact in your chosen field.

You can hold your head high as you tell people you are an engineering graduate of Imperial College London. The Faculty of Engineering continues to be ranked within the top ten engineering programmes in the world, with our disciplines being ranked in the top three in the UK according to *The Times* and *Sunday Times* Good University Guide 2017.

Congratulations and enjoy the rest of this memorable day! We look forward to hearing about your success and having you as a member of the Faculty of Engineering alumni family.

You are now part of the alumni community of over 80,000 engineering graduates

The Faculty of Engineering is ranked first in Civil Engineering and Geology in *The Times* and *Sunday Times* Good University Guide 2017

Left: The Dyson School of Design Engineering is educating a new generation of design engineers and technology leaders. The School was launched by George Osborne, the Chancellor of the Exchequer, and inventor and industrial designer Sir James Dyson in 2015.

“We encourage you to stay involved and keep pushing us to achieve greatness.”

Imperial's Aerial Robotics Laboratory, led by Dr Mirko Kovac, is conducting world-leading research into drone technology. The aircraft have numerous potential applications, from environmental monitoring to delivering supplies to remote communities.

Far left: Dr Aldo Faisal's Brain and Behaviour Lab combines methods from computing, physics and engineering with experimental human studies to understand biological behaviour.

FACULTY OF ENGINEERING: GRADUATE PRIZEWINNERS 2016

The following awards and prizes are given to students with a record of exceptional achievement in scholarship in the Faculty of Engineering.

ABS Consulting Prize

Benjamin Wei Li Guo

Airbus Prize

Charles Houston
Llewellyn Morse

ARM Project Prize

Hari-Preeya Joshi

Armourers' and Brasiers' Company Award

Jeremy Llewellyn Smith
Thomas Mcclintock

Arup Prize for Mechanical Engineering

Faron Hesse
Lukas Fieber

BAE Systems Prize

Timothy Minshall

Best Contribution to the Student Experience

Edward Kardouss

Best Year 3 BEng Poster (Student Choice) Prize

Akashaditya Das

Best Year 3 BEng Poster Prize

Vanessa Ikebudu

Best Year 4 MEng Presentation Prize

Yacine Belgaid

Bioengineering Student Centenary Prize

Teng Hui Saw
Jai Nitin Dongre

Charles Salter Prize

Alastair Daniel Russell Jones

Chemical Engineering Student Centenary Prize

Wouter Thijssen

Class of 1974 Prize

Adam Heywood

Clement Le Neve Foster Prize

Amber Madden-Nadeau

Computing Student Centenary Prize

George Steed

Corporate Partnership Programme Award

Alan Max Vey
Niklas Martin Steidl
Luke Cheeseman
Kaho Sato
Stanislav Dragiev

David West Prize

Ahmed Belkarty

Departmental Prize for Excellence

Robert Zhou
Dan Danaïla
Yordan Chaparov
Sinduran Sivarajan
Karl Wayne Chan

Donald Davies Prize

Chak Hin Bryan Liu
Yong Li Loh

Earth Science & Engineering Student Centenary Prize

Christopher Ogden
Jonathan Rio

Electrical & Electronic Engineering Student Centenary Prize

Jonathan Xiang-Sheng Zheng

Eric Laithwaite Prize

Roxana Alexandru

Ernest Edward Glorney Scholarship in Earth Science & Engineering

Christopher Ogden

Ernest Edward Glorney Scholarship in Materials

Vlad Podgurschi
Ahmed Belkarty

Governors' Prize

Maria Paulene Abundo
Seira Aoto
Constantin-Cosmin Craciunescu
Helena Bates
Elwyn Enos
Lukas Fieber

Greatorex Prize

Vijay Shamji Gami

Head of Department's Award for Overall Contribution

Luke Looney

Head of Department's Prize for Best Electronic and Information Engineering Project

Nikola Dourtchev

Henry Ford II Scholar Award

Michal Maslik

Henry Sawistowski Travel Fellowship

William Qi
Jingesi Aerai

IBM Project Prize

Jeremy Kong

Illing Prize

Luke Neal

Institute of Electrical & Electronic Engineers' Project Prize in Telecommunications

Ling Ying Lynn Chan

Institute of Materials Prize

Simon Robert Escobar Steinvall

Institute of Civil Engineering Prize

Chloe Detanger

Institution of Electrical Engineers Prize

Yu On Lee

Institution of Mechanical Engineers Prize

Kathryn Sayer

Ivor Tupper Prize

Rajan Chauhan

Katrina Jacks Memorial Prize

Emilie Lunddahl

Ken Weale Prize

Ravi Balasubramanian Shankar

Laing O'Rourke Prize

George Andrew Appleby

Lee Memorial Prize

Jake Reynolds

Lonza Prize

Shi Fen Wong

Materials Student Centenary Prize

Anna Frances Mae Williams

Mechanical Engineering Student Centenary Prize

Kai Yiu Kenneth Leung

Microsoft Research Prize

Conrad Watt

NewVoiceMedia Prize

Adrian Bogdan Draghici

Nicholas Battersby Prize

Michal Maslik

Palantir Forward Group Project Prize

Nandor Licker

Peter Pratt Memorial Prize

Enric Juan Alcocer

Project Merit Prize

Sergiu Iliev
Daniel Jonathan Earle
Andreas Mobius

RBG Structural Engineering Prize

Fiona Walport

Roger Sargent Prize

Alisha Wong
Siying Lu

Royal Aeronautical Society Prize

Tristan Alexander Stindt

Shell Prize

Teng Yew Hoo
Zheng Gu

Siemens Memorial Medal and Book Prize

Vijay Shamji Gami

Sir Bruce White Prize in Civil and Environmental Engineering

Karoline Lende

Sir Bruce White Prize in Electrical Engineering

Emad Khan

Sparkes-Pippard Prize

Chloe Detanger

Stephen Richardson Prize

Lorenzo Lombardi

Unwin Medal & Prize

Karoline Lende

Usmani Prize in Micro-Electronics

Guanhua Ying

Walter Redlich Prize

Nur Hazeerah Binti Hashim

Warrington Smyth Medal & Prize

Jonathan Tan

William Peck Book Prize

Gabriele Sessa

Willis Jackson Medal & Prize

Yiren Zhao

Winton Capital Applied Computing Undergraduate Project Prize

Nicolas Prettejohn

Willis Jackson Medal & Prize

Yiren Zhao

Winton Capital Applied Computing Undergraduate Project Prize

Nicolas Prettejohn

Dr Mary Ryan and Dr Amy Cruickshank of the Department of Materials, working on the restoration of a Dornier Do-17 German bomber.

FACULTY OF ENGINEERING: GRADUATES 2016

Please note that this list of names is provided for the information and interest of those attending the ceremony. It represents a list of undergraduates at the time of going to press, not all of whom are attending the ceremony.

Right: The Carbon Capture Pilot Plant at Imperial is the world's most sophisticated of its kind in an academic institution, providing students with a unique educational experience.

FACULTY OF MEDICINE: ORDER OF CEREMONY AND ORDER OF PROCESSION

Order of Ceremony

17:00 Faculty of Medicine

FANFARE

STUDENT ORATOR

President, Imperial College Union
Mr Nas Andriopoulos

ADDRESS

President, Professor Alice P. Gast

PRESENTATION OF GRADUATES

Presentation of Graduates from the Faculty of Medicine to whom the Associateship of the Imperial College School of Medicine and first degrees of the University have been awarded

MUSICAL INTERLUDE

Zadok the Priest
Music and words by G. F. Handel

**PRESENTATION OF THE RECIPIENTS OF
OUTSTANDING ACHIEVEMENT AWARDS**

The Vice-Provost (Education) presents:
Usama Syed

**PRESENTATION OF THE RECIPIENTS OF THE
PRESIDENT'S MEDAL**

The Vice-Provost (Education) presents:

Dr Benita Cox, Outstanding Contribution to
Excellence in Pastoral Care

Dr Sonia Kumar, Outstanding Contribution to
Teaching Excellence

Conductor of the Orchestra, Richard Dickens
(Director of Music)

Organist, Andrew Lucas

Conductor of the Choir, Dr Colin Durrant

PRESENTATION OF THE IMPERIAL COLLEGE MEDAL

The Dean of the Faculty of Medicine requests the
President to award the Imperial College Medal to:

Mrs Ezara Bird

Professor Justin Cobb

Baroness Manningham-Buller

PRESENTATION OF THE HONORARY GRADUATE

The Dean of the Faculty of Medicine requests the
President to confer the Degree of Doctor of
Science (Medicine) honoris causa of Imperial
College London on Professor Yves Levy

VALEDICTION

Chair of the Council, Sir Philip Dilley

GOD SAVE THE QUEEN

RECESSION

RECEPTION

Order of Procession

The company rises when the Procession enters the hall and remains standing until the Chair of the Council is seated.

FIRST GROUP

Student Presidents

SECOND GROUP

Director of Education Management,
Miss Susan English

Wardens

College Tutors

Readers

Senior Lecturers

Lecturers

Winners of the President's Medals: Dr Benita Cox
and Dr Sonia Kumar

THIRD GROUP

Academic Registrar, Mr David Ashton

Vice-Provost (Education),
Professor Simone Buitendijk

Dean, Faculty of Medicine, Professor Gavin Screaton

Provost's Envoy for Gender Equality,
Professor Dot Griffiths

Head of the Undergraduate School, Faculty of
Medicine, Mr Martin Lupton

Professor of Musculoskeletal Biodynamics,
Professor Alison McGregor

Clinical Consul, Faculty of Medicine, Professor
Peter Openshaw

Senior College Consul, Professor Myra McClure

College Consul (non-clinical), Faculty of Medicine,
Professor Terry Tetley

Professors of the Faculty of Medicine

Honorary Graduate of Imperial College London,
Professor Yves Levy

Winners of the Imperial College Medal:
Mrs Ezara Bird, Professor Justin Cobb and
Baroness Manningham-Buller

FOURTH GROUP

College Secretary and Registrar and Clerk to the
Court and to the Council, Mr John Neilson

Lay and Non-Academic Members of the Court

FIFTH GROUP

Provost, Professor James Stirling

President, Professor Alice P. Gast

Chair of the Council, Sir Philip Dilley

FACULTY OF MEDICINE: DEAN'S WELCOME

I am delighted to join you today in celebrating this important occasion. This is a day which recognises and celebrates the huge amount of talent, effort and perseverance you have invested in your studies. I hope you will remember it with pride for many years to come.

Research income
in 2014-15:
£182 million

Number of staff:
2,757

Number of
students: 3,666

Professor Gavin Screaton

As students in the Faculty of Medicine, you have been partners in a community of excellence which unites through science to innovate and respond to need and advance understanding of health.

Every day we solve problems and create new scientific opportunities through innovative research and training programmes, and interdisciplinary collaboration. We reach beyond institutional borders to forge connections that can deliver opportunity and impact, such as the newly-formed Cancer Research Centre of Excellence (created in partnership with the Institute of Cancer Research) or the recently expanded Imperial College Academic Health Science Centre.

We are a community united by scientific excellence, but we are also empowered by a sense of partnership and purpose. I was moved to hear about the hundreds of students from all years of Imperial's MBBS and Biomedical Science programmes who participated in street collecting, volunteering with the elderly, musical performances in hospitals and railway stations, and volunteering in homeless shelters to raise money for a good cause earlier this year. It is scientific distinction coupled with true commitment to collaboration, compassion and care that will define your future careers.

As you graduate today – and follow your chosen paths into health, academia, industry, or beyond – you remain key partners in this wide Imperial community. Please continue to connect and collaborate with us – and with each other! – through our alumni networks and programmes.

I extend the Faculty's thanks to your loved ones, friends and colleagues who have supported you in your endeavours. Finally, and most importantly, I congratulate every one of you today on your success.

The Anatome Table combines CT/MRI imaging with the traditional dissection room experience to provide unique 3D visualisations of real patient anatomy.

Above left: Professor Irene Miguel-Aliaga, Professor of Genetics and Physiology in the Institute for Clinical Sciences, uses the nervous system of the fruit fly to explore the link between the brain and the gut.

Above right: As part of Imperial's Antimicrobial Research Collaborative, researchers at the College are working to improve our understanding of infections, and to develop treatment regimens and strategies for tackling the growing threat of superbugs.

“We are a community united by scientific excellence, but we are also empowered by a sense of partnership and purpose.”

FACULTY OF MEDICINE: GRADUATE PRIZEWINNERS 2016

The following awards and prizes are given to students with a record of exceptional achievement in scholarship in the Faculty of Medicine.

Professor Robin Carhart-Harris, Head of Psychedelic Research in the Division of Brain Sciences.

- Adam Snape Audit Prize**
Paul Halford
- Adam Snape Audit Prize (Highly Commended)**
Danielle Lee
Julia Zimmermann
- Agnes Cope Prize**
Florence Louise Mouy
- Alan J Stolow Prize**
Jasmine Chingono
- Anthony de Rothschild Prize**
Dominic Marshall
- Barron Prize**
Paul Halford
Jaimie Oldham
- Beutel Prize**
Mark Sykes
- British Pharmacological Society Prize**
Dominic Marshall
- Cheadle Prize**
Caoimhe Walsh
- David Lees Memorial Prize**
Gheed Mahir

- Derek Johnson Leukaemia Prize**
Thomas Mayo
- Dudley Phillips Memorial Prize**
Bryan Tan Ling Wei
Minna Chang
- Dudley Prize**
Thomas Mayo
- Edgar Lawley Prize**
Dominic Marshall
- Faculty of Medicine Prize**
Paul Halford
