Dear [REDACTED]

SITE: Disused Railway Bridge HYB/33 - 'Gough's Bridge', OS Ref SO 334 487, OS X (Eastings) 333486, OX Y (Northings) 248762, Nearest postcode - HR3 6NY

DESCRIPTION: Planned Infilling Works to Disused Railway Bridge HYB/33

I refer to your recent enquiry regarding the matter described above, which; on the basis of the postcode that you have provided, I assume relates to a disused bridge in Ailey, near the village of Almeley.

Further to my colleague, Simon Withers contacting you separately regarding to similar proposals elsewhere in the county, I would confirm that planning permission is required for the works proposed here, and that the same requirements would apply as he outlined in his correspondence..

There are in fact two bridges in relatively proximity to each other in Ailey and, without being able to determine which your enquiry relates to, I am unable to advise on specific constraints in this case. However, one of the sites would appear to be crossed by a public footpath, whilst the other includes a priority habitat (deciduous woodland). In both cases historic contaminated land uses are identified.

I trust that this is of some assistance.

Yours sincerely

[REDACTED]

ANDREW BANKS
