Dear [REDACTED]

SITE: Disused Railway Bridges HYB5 (Huntingdon Court) HYB/9 –
(Kenchester Road Bridge) and HYB33 (Goughs Bridge)
DESCRIPTION: Planned Works to Disused Railway Bridge HYB/9

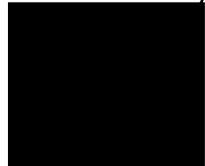

I write in connection with your letter sent on 10 September 2020 and apologise for the lack of a response which results with some confusion about the need for one following our earlier exchange in May 2020.

This matter has recently been brought to our attention and your request in relation to Part 19 of the Town and Country Planning (General Permitted Development)(England) Order 2015 as amended has therefore been reviewed.

I acknowledge the rights inferred in Class Q Part 19 but based upon the information provided with your submission there is no clear evidence of an emergency that needs to be remedied. In the absence of this and based upon the earlier apparent reliance upon Part 17 of the Order, I think it would be appropriate for the emergency provisions to be clarified in relation to what serious damage to human welfare, the environment or security is threatened.

Once again please accept my apologies for the delay and for any inconvenience caused. For the avoidance of any doubt, this response relates to all 3 structures referred to above.

Yours sincerely

SIMON WITHERS
DEVELOPMENT MANAGER
