Chris,

See below. We will of course accommodate this request.

Hi Alex

Following your request, we could re-attend the site and undertake a second day of hand dug pitting for £550 exc VAT, as previously.

Margaret, we have provisionally booked the 2nd of March, I trust this is fine with you.

Alex, we could do up to two locations, could you please mark your preferred locations on the plan I sent you yesterday?

I trust this is fine with you.

Regards

Nikos Sidiropoulos BSc MSc.

Hi Nikos,

That's very helpful thank you – this is what is causing the concern in terms of design – if the main gas main is located there it will need to be diverted.

Is there any way another trial pit can be dug to ascertain the route of this pipe?

Many Thanks

Alex Rivers

Hi Alex

I have had another discussion with our Technician who suggested that it is unlikely we found the gas (plastic). We very much doubt it comes in below those other services as the copper pipe and the terracotta pipe are probably older (installed before) the plastic gas pipe. The grounds man at the collage believed the gas pipe came in on the other side of the brick building. I have annotated one of the plans with the rough location the grounds man identified (in yellow).

I trust this is fine with you.

Thanks Nikos.

Apologies if this has already been covered but did any pf the photos detect the larger gas main believed to be beneath the water and comms?

"The "live" gas that you are referring to is indicated on National Grids plan as being a 250mm PE (plastic) service. As mentioned earlier because this is plastic (inert) we could only deploy ground penetrating radar to

locate this however it would appear to be in the area where we have already found two water services, two comm's services and an unknown service (which may or may not be the gas service in question)

It is highly likely that if the gas service is underneath the located water and comm's services then the ground penetrating radar would not be able to see it, as it would be "masked" by the shallower services that have "**Gary Lindop**

Many Thanks
