**Categories:** Egress Switch: Unencrypted

Dear xxxxxxxx,

I'm not familiar with the BIM process. Without knowing more about it, I would suggest this is a matter for the Council to determine. It's not something that would form part of DfT's assessment of the business case.

Regards,

xxxxxxx

Dear xxxxxxxxxxxx,

I apologise for bothering you so quickly again but could I ask for some further advice regarding the SWTP.

As of April 2016, Building Information Modelling (BIM) Level 2 has become compulsory within the construction industry for all centrally-procured government funded projects. However as the Hereford SWTP project has passed the detailed design stage and we will shortly be moving into the procurement/tender phase and the project started prior to the Level 2 requirement date would the BIM 2 requirement apply to the SWTP project.

I apologise for not raising sooner but would welcome your view on what is required for this specific project.

Thank you in anticipation.

Kind Regards,

**Herefordshire.gov.uk**
