

## Planning Application Comment Form Response:

Date:

23/05/2012 10:51:26

Application code No:

EM4/1211/138

The individual understands that this correspondence will be placed on the Council's website but does not wish us to include their name and address.

I am, amazed by the fact that this is even being considered. I live at the side of the first field that is being proposed for mining on **Reg 12[3] & 13 P...** My back door looks out onto it, a few steps out of the door and i'm at the boundary. 10 and half feet away to be exact. To say I am opposed to this happening is an understatement. I cannot stress to you how strongly I feel about this project NOT going ahead. I have 3 children, all of school age. I don't want them woken in a morning when they don't need to be, the noise pollution form this will be catastrophic, you only have to visit our street to see how peaceful it is. I don't want them inhaling coal dust and getting ill. Does no-one remember how ill it actually made the coal miners? My husband suffers with asthma, so the health effects for him will be horrendous. I want to be able to sell my house should I choose to (and I did want to in the next few years)but that would be an impossibility if this happened, IS an impossibility just due to the fact that it's even being considered. The dirt alone from this project will be Phenomenal; no matter how much they spray the coal there will always be that fine dust that is going to cover EVERYTHING. To the back of the house, it's like a wind tunnel so the effect on us will be exaggerated. My children love the wildlife that we get coming to our garden from the birds to the hares to the bats at night time. This will drive all that away. Not to mention ruin views and block lots of daylight with it being so close. It should never be allowed to go ahead, should never even be given consideration, being so close to residential properties. **Reg 12[3] & ...**
