Cath

Apologies for the delay in response but I have been on leave.

Is there any chance you still have availability to meet with us at your office on the 25<sup>th</sup> April?

We will organise draft options and get them to you in advance.

Kind Regards

Jason

Jason

My diary looks a bit full at the moment, what with Easter etc.  
24, 25 or 26 April are reasonably free at the moment.

It would be useful if you could email your draft options in advance,  
Regards

Cath

Cath

Further to our emails a while ago (please see below), the project is still moving with regards to the planning phase. With this in mind we were hoping that it may be possible to come and have a meeting with you to discuss the access options for the site.

I would appreciate if you could let me have some convenient dates in order that we can book in a time to come and see you.

Kind Regards

Jason

Jason

The A61 at this location is subject to a 50mph speed limit and any access for the proposals will need to demonstrate exit visibility splays and forward visibility in the region of 160m.

The existing layby on the eastern side of the A61 forms part of the adopted highway and its use as a HGV holding area is unlikely to be acceptable - this should be provided within the site.

With no details on the scale of traffic movements on the site I am unable to determine the most appropriate form of access into the site - any formal application will need to be supported by a Transport Assessment and guidance on the scoping for this can be provided by this Authority's Transportation team.

You will appreciate these brief comments represent the informal views of the Highway Authority based on the limited information provided, may not be fully exhaustive and are given without prejudice. I have copied this email to David Arnold in Planning to keep him informed.

Dave

Thanks very much for the prompt response. I am attaching a general plan of the proposed opencast in both CAD and pdf format which indicates the proposed access point. I am out early next week but when I am back I will provide a pdf of a more zoomed in area of the proposed access.

There is a second proposed access near the farm but this would be for a few cars only for the site offices.

The plans attached are being supplied to David Arnold in planning for his information, but you will appreciate that this scheme is confidential at the moment.

Please do not hesitate to contact me if you need more info in the meantime.

Kind Regards

Jason

Hi Jason,

Your first point of call would be our Development Control section, I will speak to her sometime next week and contact you afterwards regarding a site meeting. In the meantime I would be grateful if you could send me some more details including a plan of your proposed project.

Regards, Dave.

Dave

Apologies if this is not quite your department but I phoned the Highway's Department and did not get any reply. I could do with some advice on a project my company is embarking on. We are currently starting the planning application and feasibility procedure for a possible new opencast site to the west of the A61 just north of Clay Cross (near Hill Top Farm).

As part of this we will most likely be looking to create access to the site just north of the Farm. One possible option we are looking at the feasibility for is taking control of the lay-by just to the north of the farm and adapting this part of the road to create an HGV stopping and access area for the site.

Would you be able to advise me as to who I would need to talk to regarding feasibility and what information we would need to supply. If it helps, I would be able to send a rough layout of what we are proposing.

Your advice would be very much appreciated. I am contactable either at this email address or on the numbers below.

I look forward to hearing from you.

Kind Regards

Jason
