

## **Whitton Station**

### **Parking Survey**

**January 2019**

## DETAILS OF SITE

LOCATION	Whitton Station
SURVEY PERIODS	Weekday Overnight Beat: Thursday 7th February 2019 Weekday Morning Beat: Wednesday 6th February 2019 Weekday Evening Beat: Wednesday 6th February 2019 Weekend Beat: Saturday 2nd February 2019
WEATHER	Cold and dry
COMMENTS	<p>All vehicles parked on the highway are included.</p> <p>Vehicles in driveways are not included.</p> <p>Vehicles parked within 7.5m of a corner are considered unsafe.</p> <p>Vehicles observed in the Overnight beat are considered to be Residents. Vehicles not observed in the Overnight beat are considered to be non-residents.</p> <p>The Safe Capacity of streets is based on the surveyors' estimates of the number of vacant spaces. The general nature of the streets in this area is such that these estimates are open to interpretation as described below:</p> <p>Example 1: Many streets in the study area are too narrow for parking on both sides, but at certain times parking occurs on both sides of the road, probably partly on the footway . Vacant spaces may have been recorded for both sides of the street if parking was observed on both sides - or just for one side of the street if no parking was observed on the other side.</p> <p>Example 2: It is difficult to estimate the number of vacant spaces when a road is lightly parked and there are long stretches of available parking.</p> <p>Example 3: Parking may not actually occur on unmarked roads which carry through traffic. The safe capacity of these streets is unclear.</p>
INCIDENTS	None

# Whitton Station
