Minutes of Cycle Safety Working Group Wednesday 13th January 2010

Meeting date	13/01/2010
Location	TfL, Palestra

Attendance

NameOrganisationBen PlowdenTfL, Director IPDJanet KirrageTfL, Road Safety UnitLilli MatsonTfL, Smarter Travel UnitPeter McBrideTfL, Cycling, Walking & A

Peter McBride TfL, Cycling, Walking & Accessibility
Jen Calvert TfL, Cycling, Walking & Accessibility
Madeleine Rashbrooke TfL, Cycling, Walking & Accessibility

John Devenport TfL, Road Safety Unit
Duncan Moreley Metropolitan Police Service

Rhiannon Hill GLA LCC Charlie Lloyd Alistair Hanton LCC **BCOG Bob Davis** Carl Pittam Sustrans Cynthia Barlow RoadPeace Steve Steele TfL, Freight Unit Siwan Hayward TfL, CSEP Lorraine Flower Facilitator

Conference call

Duncan Pickering Institute of Advanced Motorists

Gordon Telling FTA

Apologies

Ruth Bradshaw London Councils

Item	Description	Action
1.	Welcome and introductions	
	CTC representation on the working group was	LM
	discussed, with Chris Peck to be approached	
2.	What success looks like – BP	
	Each member of the working group contributed their view of what the success of the group would look	
	like.	

	The collated statements will be circulated to the group	JC
3.	Prioritisation of contributory factors	
	Bob Davis presented a summary of factors	
	contributing to RTAs involving cyclists as analysed	
	by himself and Charlie Lloyd, following on from the	
	Cycle Safety Evidence Review meeting on	
	9/12/2009. The data is from 2008 TfL LRSU report	
	on 2007 RTA (typical of the decade). Gender,	
	geographic, vehicle and manouvre types were examined.	
	An agreed prioritisation list was presented, with the	
	top six causal factors contributing to about 70% of	
	the 445 KSI and 10/15 killed.	
	There was some discussion about vehicle speed as	
	a contributing factor, but there is insufficient data	
	collected for this to be analysed at this stage.	
4	Astion Diametra consulation	
4.	Action Planning workshop	
I	INTERPORTED AND ADDRESS OF A STATE OF A STAT	
	Working in small groups, short and long-term	
	actions to address each causal factor in turn were	
	actions to address each causal factor in turn were discussed, and who the action should be taken by.
