Request

Please answer these questions relating to the usage of Dabrafenib + Trametinib in cancer treatment.

A) Over the previous 6 months, how many patients for the following diseases have been treated with a combination of Dabrafenib + Trametinib:

- Metastatic Melanoma
22
- Adjuvant Melanoma
14
- BRAF mutated Lung Cancer
The Trust is able to provide how many Lung Cancer patients have been treated with Dabrafenib + Trametinib, but wouldn't be able to specify if they were BRAF mutated.
