Important Information and definitions

Data is limited to applicants applying to the A2* UCAS course code for 2012/3 entry

A-Level applicants have been determined using the qualification on entry codes provided by UCAS (QVALENT3 = P50, P51, P64, P65, P91 or QVALENT2 = 37 to 40); it's possible that applicants could have A-Level qualification data but not be flagged as an A-Level student based on their UCAS qualent coding.

International applicants have been determined by their fee status (i.e. overseas) not domicile.

Graduate applicants have been determined using the qualification on entry codes provided by UCAS (QVALENT3 = D80, DUK, DZZ, H11, H71, H80, HUK, HZZ, JUK, M2X, M41, M44, M71, M80, M90, MUK, MZZ or QVALENT2 = 01 to 05, 10 to 16).

A-Level data is verified but is limited to the top 3 A-Level grades per student

GCSE and degree data is not verified; it is taken from the past year's UCAS application form data (data uploaded between 01/09/2011 And 31/08/2012). Retrieving this data involves querying free-text fields and the data should not be considered a comprehensive or necessarily accurate record. If a student has more than 1 degree, the degree with the highest level was kept. If both degrees were at the same level, the degree with the highest classification was kept.
