You should already have gto this from Glen. If not can you pass around your networks.

See below for a very interesting conference on grassroots local economic development. It has been organised by the Marsh Farm Community Outreach Project in Luton with the support of Microfish. The Marsh Community Outreach Project is a social enterprise, comprising of residents in the Marsh Farm New Deal for Communities (NDC) area, working to achieve sustainable local community and economic development. For those of you unfamiliar with the NDC Programme, this is pioneering government initiative designed to tackle disadvantage and deprivation in some of the poorest neighbourhoods in Egland and Wales. The Marsh Farm experience is that the NDC Programmes (and other area based regeneration initiatives) will not succeed unless they adopt radically new approaches to strengthen the local economies of poor neighbourhoods. The Marsh Farm Community Outreach Project is pionnering the Organisational Workshop approach in the UK. The conference is an opportunity to find about more about Organisational Workshop and related approaches to what is now called 'economic inclusion', issues, It is the first conference of its kind to be organised in the UK. Initial interest is very high. Several government departments will be partipating, and the High Commissioner from Grenada will be attending. The organisers expect that around 600 people will be at the conference, including representatives of community groups, the voluntary bodies, local authorities and other statutory bodies, and the private sector, brought together by a shared realisation that the conventional approaches to regeneration are only having a limited impact and we need to explore new ideas.

If you know anyone else who might be interested, please pass the details on. If you so send this on, can you ask your recipients to do the same. You can delete the everything before 'See below' and insert you're on text. Look forward to seeing you on the 23rd of March.Could you pass this e-

mail on to any other contacts you may have who you think would be interested. Look forward to seeing you on the 23rd of March.

Damian

IT'S TIME TO SWIM AGAINST THE TIDE

All too often regeneration money flows into an area and then ebbs out again. This half-day conference explores how to make regeneration funding stick by using the 'Organisation Workshop' to release the economic potential of communities.

From the Conventional to the Inspirational

Wednesday 23 March 2005

10am to 2pm

Friends House

173 Euston Road

London

IF WE BUY A FISH, THEN WE'LL EAT FOR ONE DAY...

BUT IF WE ORGANISE OURSELVES AND LEARN HOW TO FISH - WE'LL EAT FOREVER.

The OW has an exciting track record of releasing the entrepreneurial potential of 'excluded' and 'hard-to-reach' citizens, with remarkable success rates in achieving durability and sustainability. The approach has now been successfully deployed in developing countries across three continents - and in each case the OW has proven to 'work', regardless of the different social and economic contexts, within which it was

about:blank

taking place. The challenge is to adapt this to a UK 2005 context. The half day conference is the national launch of the OW method in the UK. It is aimed at anyone with an interest in regeneration, local economic development, and community development.

IF WE BUY A FISH, THEN WE'LL EAT FOR ONE DAY ...
BUT IF WE ORGANISE OURSELVES AND LEARN HOW
TO FISH WE'LL EAT FOREVER. A damning report, published jointly by
the Prime Minister's Strategy Unit and the OPDM in January of this

year, has now officially established that the regeneration system is largely failing poor areas. Not much new there then. An extensive body of research, stretching back fifteen or more years, has catalogued a long history of failure of regeneration policy.

Or, if you can't get hold of those reports just talk to the local communities living in deprived and disadvantaged areas. They have seen regeneration programmes come and go and yet make little real difference to the social and economic fabric of their areas.

Millions of pounds of public investment have flowed into some of the poorest neighbourhoods in Britain, only to 'leak' out again. Very little appears to have 'stuck'. So the

challenge in regeneration is one of retention fundamentally a local economic issue based upon local ownership and control. How can regeneration funding be used more effectively to generate wealth and prosperity for the local community, to grow the local economy, and to create sustainable income and enterprise opportunities for local people?

The prevailing ethos of regeneration in the UK seems to be stuck in a 'provision' culture', which by definition is unable to genuinely 'enable' or 'empower' local communities. If regeneration funding is to make a real and lasting impact it must be directed less at doing things for, or even with local communities. Instead it must be the catalyst for encouraging communities to do things for and by themselves.

In other words it should be fostering, not inhibiting community enterprise.

Fortunately, in other parts of the world there are various local development models that are proving to be much more successful in achieving community self-sufficiency and long-term sustainability. One such approach, based on principles first established by Clodomir Santos de Morais, is called 'Organisation Workshop' or OW for short.

The OW has an exciting track record of releasing the entrepreneurial potential of 'excluded' and 'hard-to-reach' citizens, with remarkable success rates in achieving durability and sustainability. The approach has now been successfully deployed in developing countries across three continents - and in each case the OW has proven to 'work', regardless of the different social and economic contexts, within which it was taking place.

So the challenge is to adapt this unique and wholly innovative way of adult community and individual learning and organisation - sometimes also referred to as 'Enterprise Literacy' - to a UK 2005 context.

This half day conference is the national launch of the OW method in the UK. It is aimed at anyone with an interest in regeneration, local economic development, and community development. On Marsh Farm, in Luton, a feasibility study is already underway.

MF Outreach training

Attachments:

Marsh Farm Outreach training costs.xls

Here's our training spend - the costs were slightly over because we underestimated the costs of training for SPSS.

We'd counted for a couple of days at 350 per day but this training is 'industry standard' and can only be delivered by this company. Its less expensive to join the residential programme than to hire them to deliver here.

Also, travel costs were slightly higher than we'd planned for because an arrangement to enable 1 of the OW people to come for free fell through.

Hope this is ok.
