

Derby City Council – Freedom of Information Response

Number 10773

Date 14/12/2017

Please could you send me information for nurseries, primary and secondary schools within the Derby LEA. Please could you let me know -	
1. Energy supplier?	The agreements for gas and electricity are separate, but each with the same provider - Total Gas and Power.
2. Annual consumption?	Electricity 8,231,851 kWh
	Gas 25,274,129 kWh
3. Annual spend and contract end dates for all schools involved within the report?	The annual Spend (gas and electricity) by the participating schools in the first twelve months (01/10/16 – 01/09/17) of the agreements has been £1,176,789 (exc. VAT).
	The contracts will all expire on 30/09/20, unless any school and / or the Council should terminate their agreements early for any reason.
4. Please could you also include information of whether the contracts are organised via the LEA and if so who is the contact within the LEA for future procurement?	<p>The agreements have been organized by Derby City Council, which used ESPO frameworks. We only did so and therefore only have the information for Maintained Schools (as that term is defined in section 32 of the Education and Inspections Act 2006) and any Academy (as that term is defined by the Academies Act 2010) within Derby City that agreed with the Council that it would use the same energy provider as Derby City Council.</p> <p>The contact for procurement around utilities is currently Andrew Grover.</p>
