05/08/2022

Dear Paul Atkinson,

Freedom of Information – Clarification Required

Following your request for information we received on 25th July 2022 Camden and Islington NHS Foundation Trust would like to request the further following clarification.

With regards to your request:

Given that almost two thirds of all IAPT's referrals each year never begin a course of treatment or drop out before they finish a course of treatment please inform how many of drop out referrals have been followed up between 2013 and 2022, when are they followed up and with what results.

We would be grateful if you could please clarify:

- Please note that C&I will have patients who have dropped out of IAPT that may then re-enter the service multiple times with different outcomes / results when they were followed up. Therefore, please confirm if the information relates to individual service users who have dropped out and then re-entered the service/distinct service users?
- Also please clarify the time period for the dropouts so we can determine if they came back to the service within the time period stated above (2013 – 2022)

Please note we are unable to proceed with your request until we receive a response to the above clarification request and therefore your request has been placed on hold.

If a response to this clarification request is not received within 10 working days your request will be closed.

Yours sincerely

Information Governance Team
