

Digital Health Strategy

Delivering Digital to support mental health and social care in Surrey

Digital Health Strategy

...on a page

Innovation Culture

**Social**

We will develop digital solutions that enable people to communicate and collaborate more effectively together.

**Mobile**

We will provide easy access to the right digital solutions for people from wherever it is needed to support care delivery and business needs.

**User friendly**

We will empower people to understand how data can support the delivery of care by making digital solutions available, intuitive and easy.

**Insight**

We will deliver enterprise business intelligence exploiting data to support service transformation, clinical decision making and predictive analytics. In turn informing improved outcomes for people.

STP Alignment

Our Digital Health Strategy is about changing the way we work...

From this...

To this...

Where appropriate...

Context and changes needed

To deliver this vision of digital health we need to understand where we are now and what needs to change, the next few pages attempt to highlight key changes.

National Context

WannaCry
Global Cyber Attacks

HM Government

Personalised Health and Care 2020

Using Data and Technology to Transform
Outcomes for Patients and Citizens

A Framework for Action

National Context

DIGITAL MATURITY METRICS

READINESS

Are providers set up effectively to deliver paper-free at the point of care?

CAPABILITIES

Do providers have the digital capabilities they need to deliver paper-free at the point of care?

INFRASTRUCTURE

Are the underpinning technical enablers in place to deliver paper-free at the point of care?

CQC and NHSI will be assessing Trusts on Digital maturity and Cyber Security

Regional Context

- Sustainability and Transformation Partnerships (x3)
- Integrated Care Systems/Accountable Care Systems
- Devolution
- Local Health and Care Record Exemplar
- Global Digital Exemplars/Fast Followers
- Academic Health Science Networks
- Surrey Health Partners
- Public Health/Research

Local Context

Out of date and largely unsupported infrastructure.

Local Context

Difficult implementation leading to poor adoption and experience.

Local Context

Reporting has been a struggle with limited useful information available.

We didn't really manage this...

Local Context

We need to fix
this...

Poor user experience!

The background is a deep blue gradient with a complex network of thin, light blue lines connecting small white dots, creating a sense of digital connectivity and data flow. A faint, semi-transparent geometric shape, possibly a cube or a complex polyhedron, is visible in the upper left quadrant.

Digital Health Vision

Leading the transformation of health through safe, sustainable and innovative Digital.

Our Digital Health Strategy is about using technology to enhance connectivity and improve outcomes

Our Digital Health Strategy is about empowering improved delivery of health and social care

Digital Health Values

Collaboration: We are dedicated to a constructive, clinically influenced team-oriented environment, gathering varied perspectives, sharing knowledge, and building effective partnerships with key stakeholders.

Quality: We take pride in delivering exceptional services and commit ourselves to consistently doing so to the highest possible standard.

Safety: We strive to provide a safe environment by being consistent, efficient, reliable, and accessible to all.

Continuous Improvement: We strive for operational excellence through the on-going development of the workforce and the organisation.

Innovation: We encourage creative and critical thinking in the development of Digital to deliver improved care.

The 3 pillars that define the Digital Health Programme

A Venn diagram consisting of three overlapping circles on a dark blue background with a network of white lines and dots. The top circle is labeled 'Digital Health Intelligence', the bottom-left circle is labeled 'Digital Health Infrastructure', and the bottom-right circle is labeled 'Digital Health Transformation'. The circles overlap in the center, creating a central intersection of all three.

The 4 themes running through
the programme

Clinically led transformation through Digital

People that understand and are enabled by Digital

A Trust empowered to innovate & improve care through Digital

Safe and secure foundations to support Digital

Themes

The background is a deep blue gradient with a complex network of thin, light blue lines connecting small white dots, resembling a molecular or data network. A faint, semi-transparent geometric shape, possibly a tetrahedron, is visible in the upper left quadrant.

Key principles for each pillar

Themes

Clinically led

Digital Health Intelligence

Information
will be
accessible

Evolving
intelligence

Improved
decisions

Optimised
care
pathways

Building the 3 pillars of Digital Health through the delivery of a Digital Programme

Strategy and Programme principles:

- Every project aligned to the digital and clinical strategy
- Every project aligned to improved digital maturity
- Every project with clear outcomes, benefits and value
- Every project prioritised and governed appropriately
- Every project supporting service users and clinical practice (direct or in-direct)

Digital Innovation

While we deliver the overall digital programme we need to continue to drive digital innovation forward. The following slide outlines the principles we will adopt for digital innovation.

Digital Innovation principles

Leverage existing technology more effectively

Collaborate with Innovation and R&D to create opportunities for the future

Deliver solutions that directly improve care or effectiveness

Collaborate and co-design innovations with people that will use them

Work with people to horizon scan for potential solutions

Adopt a “QI” approach to implementation

Implement innovations that can be sustained and supported in an ongoing basis

Delivery roadmap

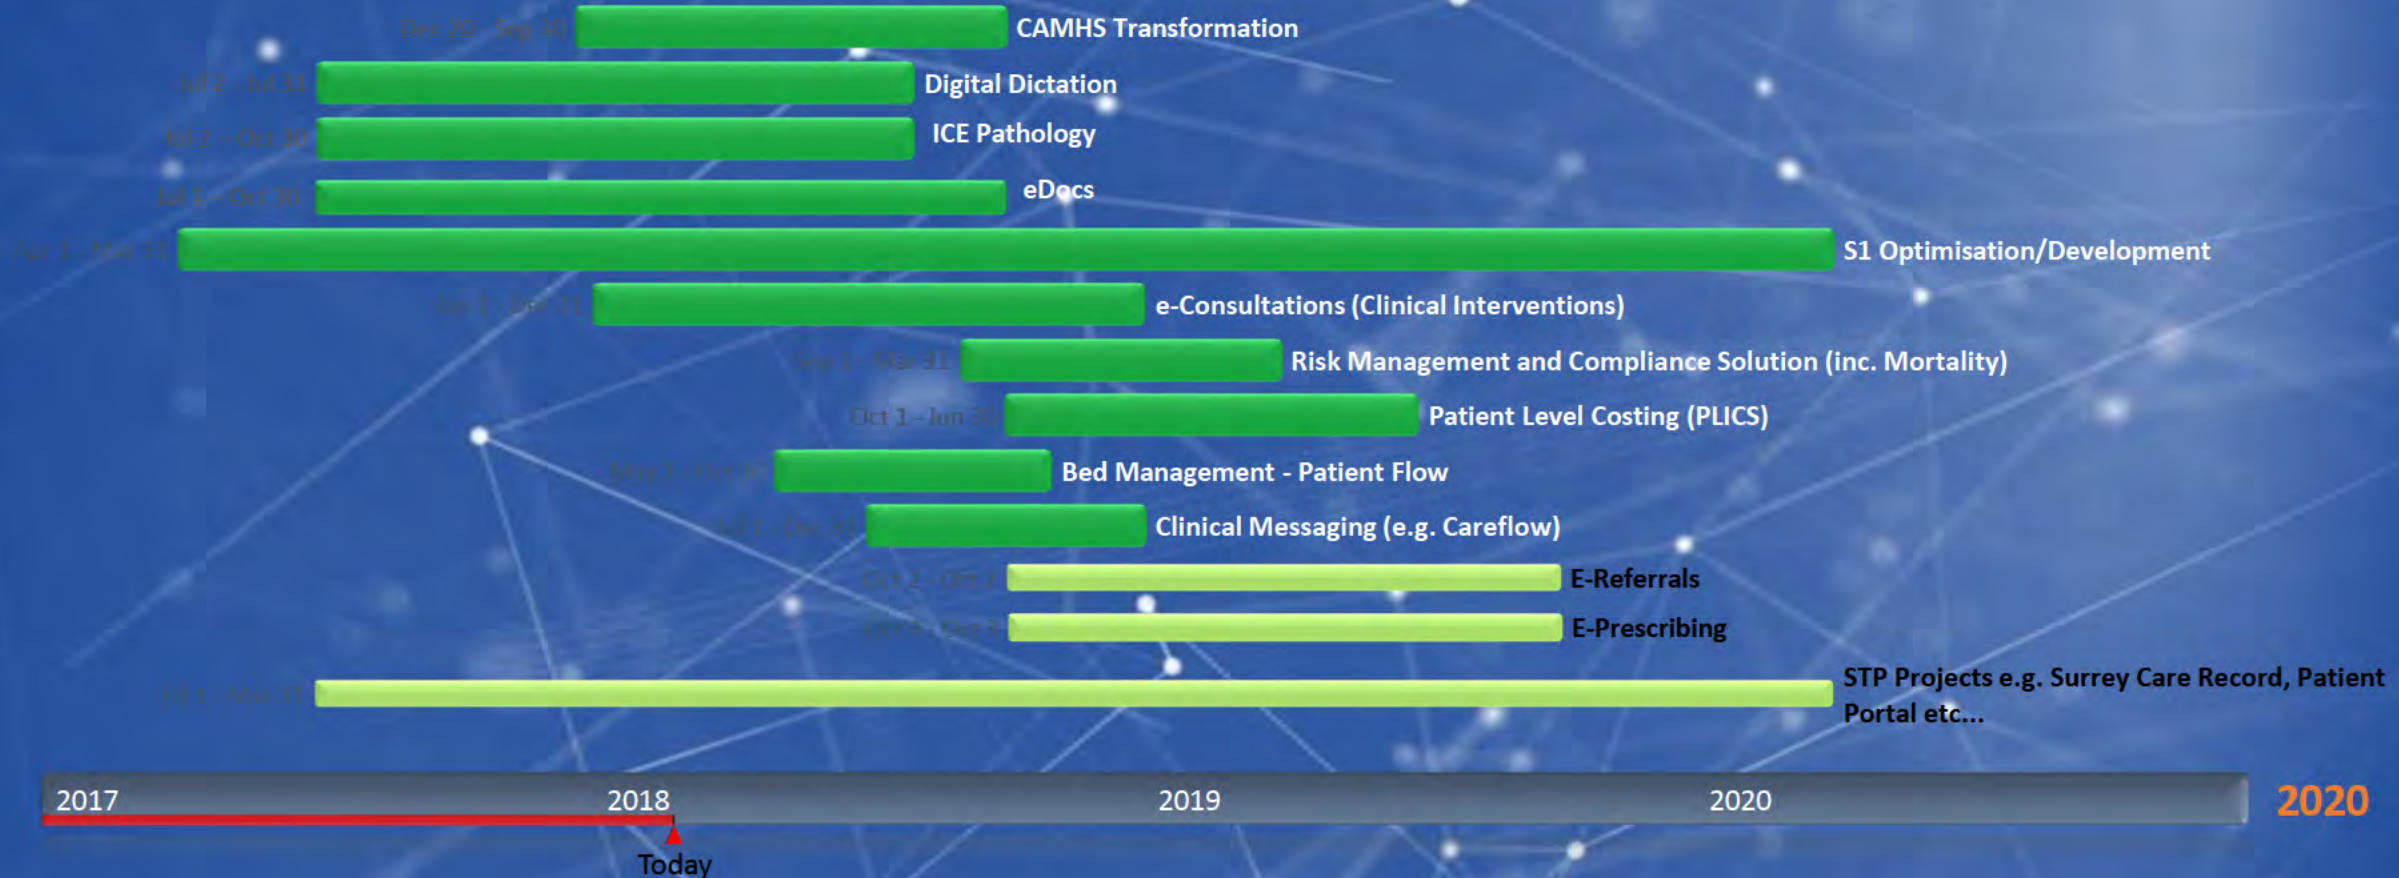

The following slides show the agreed plan for 2018/19 with indicative dates for delivery

Digital Health Infrastructure

Lighter colour bars denote projects that are on the radar but have not been formally agreed.

Digital Health Solutions
