

APPENDIX 3

Please Note

It is for Forces to develop their own administrative processes in liaison with the FMA/SMP and these may entail input from and the involvement of their respective Human Resources and Occupational Health functions plus other medical personnel as appropriate according to their particular organisational structure.

The assessment process itself should be tailored to meet the circumstances appertaining to each individual case and it is for the SMP to determine his or her own methodology.

Examples of specimen Injury Award Review Questionnaires plus a pro forma Memorandum of information supplied by a Force to the SMP are given in appendices 3A, 3B and 3C.
