

## NSPD - Scale of Charges

NSPD charges are made up of:

1. ONS charges for data supply
2. ONS charges for data use (for website use and by commercial resellers)
3. Royal Mail licensing charges
4. OS licensing charges (for non OS licensed customers taking 1m grid references)

Details of the fields available in each of the options are included in the order form.

The cost of the NSPD products depends upon:

- whether you select the Full or Core NSPD product;
- whether you have the whole or part(s) of the UK;
- whether you select 1 metre or 100 metre grid references;
- whether you select Full PAF, Thoroughfare PAF or Postcode only; and
- the proposed use of the data.

The following tables show the basic ONS costs of the products, administrative charges and the factors by which you multiply the product cost depending on your use of the data, coverage etc. excluding VAT.

### 1. Data supply (ONS charge)

Product	Cost
NSPD Core	£100
NSPD Full	£250
NHSPD	£200
Standard administrative cost for four quarterly versions	£80

### 2. Data use (ONS charge)

Data use	Data cost multiplier
Internal Business	1
Website	5
Commercial/Resellers	10

In addition to the above cost Ordnance Survey royalty charges apply for 1m grid references and depend on the number of users of the data; Royal Mail royalty charges apply based on whether Full, Thoroughfare or Postcode data is taken and on the number and type of user. Please contact ONS Geography Customer Services at [ons.geography@ons.gov.uk](mailto:ons.geography@ons.gov.uk) for details.

## Licensing Charges

### 3. Royal Mail Licensing + Fees

Single User Licence is for an individual workstation or terminal or hand-held or otherwise portable device within an End-User's organisation (which could be shared).

System Licence is for a server or other storage device owned or controlled by the End-User on a single piece of equipment. Where the End-User is an individual organisation, a System Licence is available as an alternative to paying per User. The amount payable is according to whether Full or Thoroughfare PAF or postcodes only (Data category) is supplied. Separate Licences are required for each system (per Data category supplied) upon which Data is based (and to which satellite systems may be wired for access).

Multi-System Licence is available to an organisation as an alternative to holding three or more System Licences per Data category supplied.

Royal Mail Licensing fees			
	Single user	System Licence	Multi System licence
PAF Full	£85	£3,850	£11,550
PAF Thoroughfare	£32.50	£1,050	£3,150
Postcode only	£10	£200	£600

A full description of the fields contained within each product can be found in the NSPD order form. The above prices are for national (UK) supply. Licensing for subsets, e.g. for a Government Office Region, will be calculated according to the amount of postal areas contained within that GOR. These prices will be available on request.

N.B. Website use.

A licence for using the NSPD on a website, e.g. as a lookup, will be £1,000 for unlimited transactions.

#### 4. Ordnance Survey Royalty Fees

National Statistics Postcode Directory - 1m grid references									
	Corporate	101 - 500	51 - 100	21 - 50	11-20	6-10	3-5	2	Single
