

Road name	What the project was for?	Where the work took place?	Was there a delay?	Reason for the delay?	Duration of the delay?
Ash Road, Aldershot	This work was to secure water supplies, improve water pressure and reduce the number of bursts in the Aldershot area.	Within Ash Road, Aldershot between the Lower Farnham Road junction and Church Hill.	The scheme completed on time, however further work to complete a connection took place overnight on the 17 th March and on the 20 th March 2013.	N/A	N/A
Selborne Avenue, Aldershot	A new 118 metre long water main was laid to enable water to service new properties.	Within Selborne Avenue between Overton Close and Morland Road.	No	N/A	N/A
Hawley Lane, Farnborough	Trial holes to investigate the water main within the road.	Within Hawley Lane just north of the M3 crossing.	No	N/A	N/A
Fernhill Road, Farnborough	Installation of a new 1.6km water main was required to ensure we can continue to supply the growing population of Farnborough over the coming years. The new pipeline will also help us move water around our network ensuring it gets to the areas which need it.	Within Fernhill Road between the Mayfield Road junction, along Fernhill Road to a point past Hawley Place School.	No	N/A	N/A

Reading Road, Frogmore	A new 1.4km water main was installed along Reading Road, Frogmore to deliver a more secure, robust water supply to the area as the old water main is reaching capacity and will not cope with future demand.	Within Reading Road between the A30 roundabout junction and Darby Green Road.	Yes	Initially there were more services within the ground which the Company needed to weave the new pipe around. Following the installation of the new pipeline a series of small leaks were discovered during the testing phase which needed to be repaired before we put the pipeline into operation. These repairs took place during school holiday periods.	Originally the work was due to finish 1 st October 2011 but completed in September 2012 once the repairs had been completed during the school holiday periods (between the holiday periods the road was re-opened).
Gally Hill Road, Church Crookham	This work was to install a new 1.5km water main in Gally Hill Road to supply new housing developments in the area.	Within Gally Hill Road between the Gally Hill Road/Farmhouse Way/Malthouse Close Roundabout and the junction with Aldershot Road.	No	N/A	N/A
