Thanks [REDACTED] that's fine then.

Would be good to do something proactive to highlight the reasons we're taking this action and how we know there is other skate board provision in the city.

Subject: FW: Anti Skate fittings - CENOTAPH

FYI [REDACTED]

A contractor will commence with installing anti-skate rails across the Cenotaph as per an Urban Design Team scheme from tomorrow.

These measures will address ongoing nuisance / anti social behaviour issues and enable the general public to use the space more freely and safely.

The space is being well used by skateboarders / for youth gatherings at present.

There may be negative reaction from this group as the rails go in. Restricting them using the space could become a story?

Contractors will be working in fenced compound sections to carry out the work and will be starting early in mornings.

Previous Cllrs were behind this but the new Cllrs may not be aware?

I will keep you posted. Please let me know if req any more information?

Thanks

Hi [REDACTED]

I am on leave next week – well, I'm in on Monday
[REDACTED] is around though for any queries. She did the dwgs.

I already sent you my thoughts re the order of play. Get around the Cenotaph and south end done first – they won't feel so upset about those - probs also the Electricity House end, before attempting the main space.

There will undoubtedly be some trouble. Last time they had to park their van over the strips while it went off to protect them from being removed or stamped down immediately. Good herras fencing will be needed.

Strips need to be 6-8mm. Enough to feel if you kick them. Last time the first contractor did them too low [REDACTED] came back to redo them.

Hello [REDACTED]

We now intend to be on site on Tuesday 15th to fit the steels.

Can you please ensure adequate fencing is available for the works.

Best regards
[REDACTED]
[REDACTED]

Hi [REDACTED]

Yes, those are the correct drawings.
Two sizes of steel strips to reflect the way the joints run.

Regards
[REDACTED]

Hi [REDACTED]

[REDACTED], contractor confirms works to start 21st June (weather permitting).
We shall be providing them with heras fencing and monitoring.
Quick drying adhesive being used will reduce tampering that happened last time.
[REDACTED] be good if could meet with you on-site on the Monday afternoon to check installing as per you spec / plan .
Thanks

Hello [REDACTED]

Plans to install anti skate strips around cenotaph area leading up towards Electricity house to alleviate issues.

Materials and contractors ready to go, waiting on dry weather for install as water will weaken bond.

All the best,

[REDACTED]

Hi [REDACTED]

Yes, [REDACTED] have just awarded a contract to install some more steel strips to reduce the skateboarding issue (not sure it will ever entirely go away!) This is not yet public knowledge though and we would want to keep it that way until they start on site.

[REDACTED] suggest he replies to say the BCC are aware of the issues and actively considering works to reduce the impact of skateboarders on the space?

Hi [REDACTED]

If the weather continues on this course we should be ok for mid-May at this time.

Steels are arriving on Monday next week.

Can you re supply me with the map that shows the location of the 150 no strips that need to be installed.

Best regards

Hello all.

Thanks for getting back to [REDACTED]

Yes can confirm that [REDACTED] will be handling installation. [REDACTED] can you advise whether you would like the materials delivered directly?

Alternatively we could take delivery at [REDACTED], but due to recent pedestrianisation of old city, it will be a little more difficult to collect from here and take down to Cenotaph on the day.

Let me know your thoughts.

All the best,

[REDACTED]

Subject: FW: Cenotaph Square skate strips

Morning [REDACTED]

Attached [REDACTED] layout plan for the anti-skate strips on the flat areas across the Cenotaph.

Along with the quote from [REDACTED] to supply and install.

From experience of installing the last lot, this time they will be using quick dry adhesive to set them.

They also require that we provide hara fencing to barrier off sections overnight to stop the work being tampered with by the skaters.

Let me know if any questions?

[REDACTED]

Thanks [REDACTED] Are providing Hera fencing. Quick drying adhesive will hopefully help.

[REDACTED]
